2 KONSTANTIN WALMSLEY, M.D.,  
3 after having been duly sworn, was  
4 examined and testified as follows:

5 - - -

6 EXAMINATION

7 - - -

8 BY MR. PRITCHETT:

9 Q. Would you tell us your name,  
10 please?

11 A. Konstantin Walmsley.

12 Q. And what is your  
13 professional address?

14 A. 777 Bloomfield Avenue, Glen  
15 Ridge, New Jersey 07028.

16 Q. Dr. Walmsley, my name is  
17 Chuck Pritchett. I represent Ethicon and  
18 Johnson & Johnson in this lawsuit brought  
19 by Dawn and Michael Baker.

20 Do you understand that  
21 you've been identified as a case-specific  
22 expert in this lawsuit by the Bakers?

23 A. Yes.

24 Q. And do you understand that

Konstantin Walmsley, M.D.

Page 7

1 we are here today to talk about all of  
2 your specific -- case-specific opinions,  
3 the grounds and basis for those opinions?

4 A. Yes.

5 Q. And as you know, this is my  
6 only opportunity to talk to you, so if  
7 you could make sure to try to give me all  
8 of your opinions and the grounds for  
9 those opinions, I would appreciate it.

10 A. Certainly.

11 Q. And you're prepared to  
12 discuss all of your opinions and the  
13 basis for those opinions today?

14 A. Yes, sir.

15 Q. I understand you have four  
16 case-specific opinions: One, that Ms.  
17 Baker has scar plate formation due to the  
18 TVT Secur?

19 A. Yes.

20 Q. Two, that her complaints of  
21 pelvic pain and dyspareunia are caused by  
22 the scar plate formation?

23 A. Yes.

24 Q. And you performed a

Konstantin Walmsley, M.D.

Page 8

1 differential diagnosis. Right?

2 A. I did.

3 Q. Your third opinion is that  
4 she still is experiencing pelvic pain,  
5 vaginal pain, dyspareunia, and mixed  
6 urinary incontinence?

7 A. Yes.

8 Q. And your last opinion  
9 addresses her prognosis.

10 A. That's correct.

11 Q. Any other opinions that I  
12 missed or are contained in your report?

13 A. No, I don't believe so.

14 Q. And of course I'm leaving  
15 out -- you have two general causation  
16 opinions as well; correct?

17 A. Yes, sir.

18 Q. And by the protocol, we're  
19 not here to talk about those today.

20 A. That's correct.

21 Q. Okay.

22 Can you tell me when you  
23 were first retained by Ms. Baker's legal  
24 counsel to do work in this case?

Konstantin Walmsley, M.D.

Page 9

1           A.     It would have been in the  
2 mid to latter part of May.

3           Q.     May of this year?

4           A.     That's correct.

5           Q.     And you've worked with that  
6 law firm before?

7           A.     I had.

8           Q.     And when did you first begin  
9 your work for your opinions in this  
10 lawsuit?

11          A.     At some point in June, I  
12 would have begun my work on this case.

13          Q.     And that's about the time  
14 that you performed an independent medical  
15 examination of Ms. Baker?

16          A.     Yes, sir.

17                 MR. PRITCHETT: And this is  
18 not totally a memory test. I'll  
19 give you your report to refer to  
20 as we proceed.

21                 I want to mark as Exhibit 1  
22 to your deposition the deposition  
23 notice.

24                         - - -

Konstantin Walmsley, M.D.

Page 10

1                   (Deposition Exhibit No.  
2                   Walmsley (Baker)-1, Notice of  
3                   Deposition of Konstantin Walmsley,  
4                   M.D., was marked for  
5                   identification.)

6                   - - -

7                   THE WITNESS: Thank you.

8                   BY MR. PRITCHETT:

9                   Q.     Have you seen that notice  
10                  before I just handed it to you?

11                  A.     I have.

12                  Q.     Schedule A requests that you  
13                  bring certain documents described there.  
14                  Can you tell me what, if anything, you  
15                  brought with you today?

16                  A.     What I have today is my  
17                  laptop computer, which has electronic  
18                  versions of many of the Schedule A  
19                  requests.

20                  Q.     Well, can you tell me what  
21                  those are?

22                  A.     It has my curriculum vitae.  
23                  It contains my reliance list. It would  
24                  contain my report, and it also may

Konstantin Walmsley, M.D.

Page 11

1 contain some of my billing, although I  
2 sometimes have billing on one of my other  
3 computers.

4 Q. Any other documents?

5 A. No.

6 Q. What about medical records?

7 MS. SANTRA: We're going to  
8 -- I will send you a link of all  
9 the medical records that were sent  
10 to Dr. Walmsley. And I have his  
11 C.V. and reliance list that were  
12 served with the report if you need  
13 those.

14 BY MR. PRITCHETT:

15 Q. Can you tell me  
16 approximately how much chargeable time  
17 has accrued for your work in this case?

18 A. Yes. Roughly 7 to 11 hours  
19 to the best of my recollection.

20 Q. And you charge \$500 per  
21 hour; is that correct?

22 A. Yes, sir.

23 Q. Does that include deposition  
24 testimony?

Konstantin Walmsley, M.D.

Page 12

1 A. Yes.

2 Q. Is that the same charge for  
3 performing an IME?

4 A. Not exactly. A lot of -- my  
5 IME charges tend to be vetted or scrubbed  
6 through the office, so I don't get  
7 compensated for the IME. My practice  
8 gets compensated for the IME.

9 Q. Do you charge \$500 per hour  
10 for reviewing medical records?

11 A. Yes.

12 Q. And I was going to ask you,  
13 your work in this case, is this run  
14 through your practice group, which is  
15 Urology Group of New Jersey, or you  
16 individually?

17 A. Me individually.

18 Q. Is there anything requested  
19 in Schedule A which you did not -- well,  
20 you didn't bring anything, but which  
21 we've omitted?

22 You mentioned your report,  
23 your C.V., your reliance list, maybe some  
24 billing. Plaintiffs' counsel's going to

Konstantin Walmsley, M.D.

Page 13

1 send me a link to medical records.

2 Anything else?

3 A. No.

4 MR. PRITCHETT: I'm going to  
5 mark as Exhibit 2 your report.

6 - - -

7 (Deposition Exhibit No.  
8 Walmsley (Baker)-2, Rule 26 Expert  
9 Report of Konstantin Walmsley,  
10 M.D., was marked for  
11 identification.)

12 - - -

13 MR. PRITCHETT: Counsel, do  
14 you have a copy of the report to  
15 refer to?

16 MS. SANTRA: Yes.

17 BY MR. PRITCHETT:

18 Q. Does that appear to be a  
19 copy of your report?

20 A. Yes.

21 MR. PRITCHETT: And I'm  
22 going to mark as Exhibit 3 your  
23 C.V. that was provided to us at  
24 the time your report was served.

Konstantin Walmsley, M.D.

Page 14

1                               - - -  
2                               (Deposition Exhibit No.  
3                               Walmsley (Baker)-3, 11/20/15  
4                               Curriculum Vitae of Konstantin  
5                               Walmsley, was marked for  
6                               identification.)

7                               - - -

8       BY MR. PRITCHETT:

9               Q.       Does that appear to be a  
10       copy of your C.V.?

11              A.       Yes, sir.

12              Q.       There was some mention of an  
13       updated C.V. Can you tell me what would  
14       be updated?

15              A.       The only thing I updated  
16       were some of my extracurricular,  
17       nonprofessional activities.

18              Q.       Do any of those  
19       extracurricular activities have anything  
20       to do with your opinions in this case?

21              A.       No, sir.

22              Q.       Or your work in this case?

23              A.       No.

24              Q.       You said they're

Konstantin Walmsley, M.D.

Page 15

1 nonprofessional?

2 A. Yes, sir.

3 - - -

4 (Deposition Exhibit No.

5 Walmsley (Baker)-4, Document

6 Titled "Materials Reviewed", was

7 marked for identification.)

8 - - -

9 BY MR. PRITCHETT:

10 Q. I'm going to hand you what

11 I've marked as Exhibit 4. That is your

12 -- what you called the reliance list.

13 And I believe on here, it's called

14 "Materials Reviewed."

15 Is there anything to be

16 supplemented for the reliance list?

17 A. No.

18 Q. Was the reliance list

19 prepared by you or Ms. Baker's legal

20 counsel?

21 A. It was prepared by me.

22 Q. And were there any materials

23 that you considered for your opinions in

24 this case that you requested, but did not

Konstantin Walmsley, M.D.

Page 16

1 receive?

2 A. No.

3 Q. It mentions depositions of  
4 medical providers?

5 A. Correct.

6 Q. Is it your understanding  
7 that there were any depositions of  
8 medical providers in this case?

9 A. Not in this case, no.

10 Q. You mentioned instructions  
11 for use and on that you put Gynecare TVT  
12 instructions for use. Do you see that?

13 A. I do.

14 Q. Is that the IFU you reviewed  
15 for your opinions in this case?

16 MS. SANTRA: Object to the  
17 form.

18 THE WITNESS: Not  
19 specifically.

20 BY MR. PRITCHETT:

21 Q. Does that pertain to your  
22 general causation opinions?

23 A. The general causation  
24 opinions are related, yes, to the TVT

Konstantin Walmsley, M.D.

Page 17

1 IFU, but it's applicable to the year in  
2 which the case relates to and also the  
3 type of TVT product, whether it's, for  
4 example, TVT Secur, which has a different  
5 IFU -- it's meant to encompass or  
6 incorporate all of them. If that's not  
7 specific there, I apologize.

8 Q. So you did review the TVT  
9 Secur IFU for your opinions in this case?

10 A. Yes.

11 Q. Did you actually read over  
12 the IFU again or just relying upon your  
13 past use of it?

14 A. I read it over again.

15 Q. And you mentioned the  
16 patient brochures as well?

17 A. Yes.

18 Q. Did you have any  
19 communications with Ms. Baker's treating  
20 doctors?

21 A. No, sir.

22 Q. Did you feel that that  
23 wasn't necessary for your opinions?

24 A. I felt that it wouldn't have

Konstantin Walmsley, M.D.

Page 18

1     been very helpful, correct.

2             Q.     Would you have liked to have  
3     had access to a deposition of, for  
4     instance, Dr. Hodges, who implanted the  
5     TVT Secur?

6             MS. SANTRA: Object to form.

7             THE WITNESS: I think the  
8             depositions of the implanting  
9             surgeons can in certain instances  
10            be helpful.

11    BY MR. PRITCHETT:

12            Q.     How can they be helpful?

13            A.     To perhaps give me an  
14     impression of, in a surgeon's words, the  
15     indications for the procedure, his or her  
16     understanding as to the risks, benefits,  
17     and alternatives at the time when they  
18     were providing informed consent and  
19     executing the procedure, and also to  
20     perhaps give additional information  
21     peri-procedurally as far as how patients  
22     did and their attributing benefits,  
23     complications, and such to the -- to --  
24     you know, in their words, what the

Konstantin Walmsley, M.D.

Page 19

1 patient was experiencing.

2 Q. Were you provided with any  
3 summaries of medical records prepared by  
4 others?

5 A. Not to my knowledge, no. I  
6 don't recall any.

7 Q. You didn't prepare any  
8 medical chronology or summaries?

9 A. My medical chronology was  
10 really generated on the report kind of as  
11 a realtime document as I was going  
12 through the records.

13 Q. Were you -- you mentioned  
14 that you had depositions -- well, let me  
15 take that back.

16 Did you review the  
17 deposition of Ms. Baker?

18 A. I did.

19 Q. I didn't see it listed on  
20 your reliance list.

21 A. If you look at my expert  
22 report -- and I apologize for the  
23 confusion -- at the bottom of page 2, her  
24 deposition was part of my review.

Konstantin Walmsley, M.D.

Page 20

1 Q. Bottom of page 2 of your  
2 report.

3 A. Correct. The reliance list,  
4 if I was being more thorough, I would  
5 have probably written "Depositions of  
6 Medical Providers and/or Patient," which  
7 I did not, to my discredit.

8 Q. Did you review the  
9 deposition of her husband?

10 A. I don't recall seeing her  
11 husband's deposition.

12 Q. And, again, you didn't feel  
13 that that's necessary for your opinions  
14 and conclusions in this case?

15 A. I would say, perhaps not  
16 necessary, but could have been helpful.

17 Q. Have you communicated in any  
18 way with other experts in this case?

19 A. No.

20 Q. Plaintiffs have designated  
21 other expert witnesses, so you haven't  
22 talked to them?

23 A. Yeah, I mean, I don't know  
24 of all of them, so -- but I don't believe

Konstantin Walmsley, M.D.

Page 21

1 so, no.

2 Q. Have you read any of the  
3 other expert reports?

4 A. I've read one expert report.

5 Q. Which one was that?

6 A. If you want to call it that.

7 It was Dr. Khandwala's IME, Salil  
8 Khandwala.

9 Q. Sure. So you have a copy of  
10 his report?

11 A. Yes.

12 Q. Did you bring that today?

13 A. I have it here, yes.

14 Q. Have you exchanged or shared  
15 documents with any of the other experts  
16 in this case, regardless of whether you  
17 talked to them or not?

18 A. No.

19 Q. So you're not relying on the  
20 opinions of other experts in this case  
21 for your opinions.

22 MS. SANTRA: Object to form.

23 THE WITNESS: No, not -- not  
24 directly, I'm not.

Konstantin Walmsley, M.D.

Page 22

1 BY MR. PRITCHETT:

2 Q. What do you mean by  
3 "directly"?

4 MS. SANTRA: Object to form.  
5 He's incorporated the TVT-S  
6 general opinions in his reliance  
7 list.

8 THE WITNESS: Yeah.

9 BY MR. PRITCHETT:

10 Q. So did you review -- you  
11 mentioned you did not review the reports  
12 of other experts in this case; correct?

13 A. I didn't know if you were  
14 speaking about case-specific or general  
15 reports, so I stand corrected. I thought  
16 you were talking about case-specific  
17 reports.

18 Q. That's fine and I should  
19 have clarified.

20 Did you read the general  
21 causation reports?

22 A. I've read some of them.

23 Q. For this case.

24 A. Correct.

Konstantin Walmsley, M.D.

Page 23

1 Q. Which ones did you read?

2 A. In this instance, the Jerry  
3 Blaivas general report.

4 Q. Who I understand you know.  
5 Right?

6 A. He trained me a long time  
7 ago, yes, yeah.

8 Q. Any others?

9 A. Primarily just that one.

10 Q. Why did you read his report?

11 A. I -- well, I found it  
12 helpful. I found it comprehensive and,  
13 you know, I think of him as a key opinion  
14 leader in the world of pelvic  
15 reconstructive surgery, so I lend a lot  
16 of weight to his opinions.

17 Q. Did you read his report  
18 before you formulated your opinions in  
19 this case?

20 A. I had read it before then, I  
21 believe, yeah.

22 Q. Which of your specific  
23 causation opinions did you rely on Dr.  
24 Blaivas' report for?

Konstantin Walmsley, M.D.

Page 24

1 MS. SANTRA: Object to form.

2 THE WITNESS: Specific

3 opinions.

4 MR. PRITCHETT: Yes.

5 THE WITNESS: Well, I think,

6 to be fair, I'd probably have to

7 look at his report to specifically

8 answer your question, but

9 certainly as it relates to some of

10 the complications this individual

11 suffered, Dr. Blaivas describes in

12 his causation reports the

13 incidence of these complications

14 and the fact that he sees them in

15 patients implanted with mesh.

16 BY MR. PRITCHETT:

17 Q. So it deals mainly with

18 complication rates of certain complaints

19 patients have?

20 MS. SANTRA: Object to form.

21 THE WITNESS: Well, I think

22 some of it's that and some of it

23 also is qualitative as well as

24 quantitative data.

Konstantin Walmsley, M.D.

Page 25

1 MR. PRITCHETT: Let me hand  
2 you what I'm going to mark as  
3 Exhibit 5.

4 - - -

5 (Deposition Exhibit No.  
6 Walmsley (Baker)-5, 6/20/16  
7 Encounter Summary for Dawn Baker,  
8 was marked for identification.)

9 - - -

10 MR. PRITCHETT: And this is  
11 what's called encounter summary,  
12 dated June 20, 2016.

13 I think these are your notes  
14 from your IME; is that correct?

15 THE WITNESS: That's  
16 correct.

17 MR. PRITCHETT: You may want  
18 to keep Exhibits 2 and 5 handy  
19 when we start talking about her  
20 specifically.

21 THE WITNESS: Okay.

22 BY MR. PRITCHETT:

23 Q. Are there any written  
24 materials concerning what you did for

Konstantin Walmsley, M.D.

Page 26

1 your case-specific opinions and what you  
2 found in your examination of Ms. Baker  
3 other than what's in Exhibit 2, which is  
4 your report, and Exhibit 5, which is your  
5 encounter summary --

6 A. No.

7 Q. -- or the IME report?

8 A. Right. No, there's not.

9 Q. If you'd look at Exhibit 2,  
10 which is your report, look at the third  
11 page, under "Clinical History" --

12 A. Yes.

13 Q. -- you listed certain dates  
14 and treatments of Ms. Baker in the past;  
15 correct?

16 A. Yes.

17 Q. Why did you list those  
18 particular events rather than others?

19 A. Generally speaking, I tried  
20 to provide bullet points in the clinical  
21 history that were in my opinion  
22 reflective or contributory to the reasons  
23 for my report.

24 Q. Is that another way of

Konstantin Walmsley, M.D.

Page 27

1 saying these were relevant to your  
2 report?

3 A. Yes.

4 Q. Is it fair to say that other  
5 records of visits to healthcare providers  
6 are not relevant to your report?

7 MS. SANTRA: Object to form.

8 THE WITNESS: I would  
9 probably say less relevant. I  
10 mean, there may be a finding in a  
11 visit of, I don't know, pelvic  
12 pain or something that one might  
13 consider as somewhat relevant, but  
14 to my estimation, perhaps not  
15 relevant enough to be provided in  
16 the summary.

17 BY MR. PRITCHETT:

18 Q. I notice that the last visit  
19 that's noted in "Clinical History" was  
20 June 30, 2009, which was her postop visit  
21 with Dr. Hodges; is that correct?

22 A. Yes.

23 Q. And, again, why wouldn't you  
24 want to look at records of her treatment

Konstantin Walmsley, M.D.

Page 28

1 after the implant surgery?

2 A. Well, to some degree, I may  
3 not have had or may not have seen those  
4 records; and to the other extent, I guess  
5 I put forth the relevance.

6 Q. So are you saying you may  
7 not have all of her medical records?

8 MS. SANTRA: Object to form.  
9 Since this report was written, we  
10 have sent more records that we've  
11 gotten to Dr. Walmsley. So when  
12 he wrote this report, he may have  
13 had less records than he does  
14 today, if that makes sense.

15 MR. PRITCHETT: Is this link  
16 going to tell me what records he  
17 had before he prepared his report?

18 MS. SANTRA: Well, he tells  
19 you on page 2 --

20 MR. PRITCHETT: He lists  
21 providers.

22 MS. SANTRA: Yep, I can set  
23 it up that way.

24 MR. PRITCHETT: So, yeah, I

Konstantin Walmsley, M.D.

Page 29

1           would like to know exactly what he  
2           had --

3                       MS. SANTRA: Sure.

4                       MR. PRITCHETT: -- at the  
5           time he finalized his report and  
6           then what was sent subsequently.

7                       MS. SANTRA: Okay.

8 BY MR. PRITCHETT:

9           Q.       Do you happen to know that,  
10          Dr. Walmsley?

11          A.       It wasn't a lot of stuff  
12          that I received subsequently. I don't  
13          remember the specifics.

14          Q.       Is it possible you had no  
15          medical records pertaining to Dawn  
16          Baker's care and treatment after the mesh  
17          surgery other than her postop visit?

18          A.       I don't believe that to be  
19          the case.

20          Q.       So were -- is it your  
21          understanding that plaintiffs' counsel  
22          were choosing which records for you to  
23          review?

24                       MS. SANTRA: Object to form.

Konstantin Walmsley, M.D.

Page 30

1 THE WITNESS: I don't think  
2 that's the case either, because --  
3 I mean, that hasn't happened with  
4 previous work I've done for the  
5 lawyers who retain me for this  
6 case.

7 BY MR. PRITCHETT:

8 Q. When you undertook your work  
9 in this case, did you want to have her  
10 complete medical records pertaining to  
11 her care and treatment?

12 A. Of course, yeah.

13 Q. When you received what  
14 medical records you did before you  
15 prepared your report, did you think those  
16 were the complete records of her care and  
17 treatment?

18 A. That was my understanding.

19 MS. SANTRA: Object to form.  
20 I'll just state for the record, as  
21 discovery is ongoing, we get -- we  
22 receive more records for each case  
23 every day. So to the extent  
24 you're trying to imply we're

Konstantin Walmsley, M.D.

Page 31

1 withholding records from Dr.

2 Walmsley, that was not the case.

3 BY MR. PRITCHETT:

4 Q. Sitting here today -- strike  
5 that.

6 So you've received some  
7 additional medical records from  
8 plaintiffs' counsel that reflect visits  
9 with healthcare providers after her  
10 implant surgery; correct?

11 A. Yes.

12 Q. So you know she sought some  
13 care and treatment after implant surgery;  
14 correct?

15 A. Correct.

16 Q. Do -- since we -- well, do  
17 any of those postimplant medical records  
18 other than her postop visit have any  
19 significance to your opinions?

20 A. No.

21 Q. Looking at your materials  
22 relied upon again, let's go back to the  
23 instructions for use. You mentioned that  
24 you did look at the TVT Secur IFU;

Konstantin Walmsley, M.D.

Page 32

1 correct?

2 A. Yes, I did.

3 Q. How often in your practice  
4 do you review instructions for use?

5 A. Often, yeah.

6 Q. What is "often"?

7 A. Well, if I'm doing a  
8 procedure over and over again, I don't  
9 look at the IFU each time for the  
10 procedure, but I always like to review it  
11 during the first few executions of a  
12 procedure, both before and even  
13 afterwards, just to corroborate, for  
14 example, my surgical technique.

15 And I would say, every six  
16 months to a year, I like to revisit the  
17 IFU, not only to refresh my memory, but  
18 just to kind of reinforce my  
19 understanding of a product when using it.

20 Q. Is that the only source of  
21 information you look at when you're using  
22 a product?

23 A. No.

24 Q. What other sources of

Konstantin Walmsley, M.D.

Page 33

1 information do you look at?

2 A. Well, I think there are  
3 different things you try to glean from a  
4 product. I mean, as far as surgical  
5 technique, for example, some of that, I  
6 can derive from key opinion leaders,  
7 papers that describe procedure.

8 As far as expectations of  
9 the procedure, peri-procedurally, risks,  
10 benefits, some of that information can be  
11 extracted from authoritative textbooks,  
12 manifests that are peer reviewed or  
13 written by key opinion leaders.

14 There are workshops and  
15 cadaveric labs that device manufacturers  
16 also organize that can be helpful as  
17 well.

18 Q. You mentioned that you look  
19 at the IFU partially for risk  
20 information?

21 A. It helps me, yeah.

22 Q. Would it be within the  
23 standard of care for a surgeon to only  
24 look at the IFU for risk information

Konstantin Walmsley, M.D.

Page 34

1 before using a product?

2 A. I would say so. I would  
3 think so.

4 Q. Do you think it's important  
5 for surgeons to look at articles and  
6 studies as well for risk information?

7 A. I think that can be helpful  
8 as well, yes.

9 Q. Don't you agree that the  
10 more a product is used, more information  
11 becomes available about benefits and risk  
12 information?

13 MS. SANTRA: Object to form.

14 THE WITNESS: Well, I think  
15 you're -- well, it depends upon  
16 the specific benefits or risks  
17 being put forth, but possibly,  
18 yes.

19 BY MR. PRITCHETT:

20 Q. So is it important for a  
21 surgeon such as yourself to keep abreast  
22 of that type of information as it becomes  
23 available?

24 A. I think that's helpful.

Konstantin Walmsley, M.D.

Page 35

1 Q. And where do you get that  
2 information other than the IFU?

3 A. Well, I think the same  
4 things I put forth before in your  
5 question.

6 Q. So professional  
7 organizations.

8 A. To some extent, professional  
9 organizations. You know, more so updated  
10 literature, interactions with key opinion  
11 leaders, whether they come in the form of  
12 device manufacturer-organized conferences  
13 or other types of venues and conferences.

14 Q. Okay. And you do that in  
15 your practice?

16 A. I try to, yeah.

17 Q. You mentioned in your  
18 Exhibit 4 incorporated materials -- well,  
19 we already talked about that.

20 You mentioned the medical  
21 literature in your reliance list, which  
22 is Exhibit 4; correct?

23 A. Yes.

24 Q. Did you specifically look at

Konstantin Walmsley, M.D.

Page 36

1 any of these -- any of this literature  
2 other than the IFU in preparing your  
3 report in the Dawn Baker case?

4 MS. SANTRA: Object to form.

5 THE WITNESS: Well,  
6 obviously, some, I relied upon  
7 more than others; but, you know,  
8 the reality is, I -- each article  
9 has a certain amount of weight in  
10 terms of allowing me to arrive at  
11 opinions.

12 Was there one particular  
13 article that was very, very  
14 helpful in me formulating my  
15 opinions on Dawn Baker? I mean,  
16 as we sit here today, I can't say,  
17 oh, well, I really found the  
18 Duckett article more helpful, for  
19 example. As we sit here today, I  
20 can't point to one or a number of  
21 articles that were more relied  
22 upon than others.

23 BY MR. PRITCHETT:

24 Q. Do these articles also

Konstantin Walmsley, M.D.

Page 37

1     pertain to your general causation  
2     opinions?

3             A.     Yes.

4             Q.     Are you able to  
5     differentiate which of these articles  
6     pertain to your general causation  
7     opinions as opposed to your specific  
8     causation opinions?

9             A.     Well, my two general opinion  
10    articles in the Dawn Baker case relate to  
11    proper informed consent and the fact that  
12    safer alternative designs were in  
13    existence.

14                    So to that end, the AMA at  
15    8.08, information relating to informed  
16    consent, the TVT Secur instructions for  
17    use are obviously very instrumental to my  
18    general opinions.

19                    And then primarily towards  
20    page 3 of my reliance list, there is some  
21    data relating to autologous rectus  
22    fascial slings and their equivalents that  
23    specifically play into general opinion  
24    number 2.

Konstantin Walmsley, M.D.

Page 38

1                   So those are some of the  
2   references in my reliance list that were  
3   perhaps a little bit more impactful for  
4   my general opinions formulations.

5                   Q.     I didn't see on your  
6   reliance list any Ethicon documents other  
7   than the IFU and the patient brochure; is  
8   that correct?

9                   MS. SANTRA: Object to form.  
10                   He's -- we talked about the  
11                   incorporated materials in the  
12                   general TVT Secur report.

13   BY MR. PRITCHETT:

14                   Q.     What Ethicon documents other  
15   than the IFU and the patient brochures  
16   are you relying upon for your  
17   case-specific opinions?

18                   MS. SANTRA: Object to form.

19                   THE WITNESS: Really,  
20                   primarily, those are the only ones  
21                   that are Ethicon specific.

22   BY MR. PRITCHETT:

23                   Q.     What about depositions of  
24   Ethicon representatives; are you relying

Konstantin Walmsley, M.D.

Page 39

1 upon any of those for your case-specific  
2 opinions?

3 A. We talked about Dr. Blaivas'  
4 report. Is that something that should be  
5 included in this or --

6 Q. No, I'm talking about  
7 depositions of representatives or  
8 individuals of Ethicon.

9 A. Pardon me. None.

10 Q. And can you tell me what you  
11 did to prepare for this deposition?

12 A. Yes. I briefly re-reviewed  
13 Dawn Baker's medical records, including  
14 the updated records I was provided. I  
15 re-reviewed my expert report and my IME  
16 report and I also re-reviewed the report  
17 of Dr. Khandwala.

18 Q. Do you know Dr. -- and I'm  
19 going to butcher his name -- Khandwala?

20 A. I do not.

21 Q. And of course you met with  
22 counsel; correct?

23 A. Briefly this morning, yes.

24 Q. We'll talk a little bit

Konstantin Walmsley, M.D.

Page 40

1 about some of your background so I get a  
2 better understanding.

3 You are a board-certified  
4 urologist; correct?

5 A. Yes, sir.

6 Q. And in your practice, do you  
7 treat men and women?

8 A. I do.

9 Q. And what's the percentage  
10 breakdown between men and women?

11 A. It's about two-thirds and  
12 one-third, two-thirds men/one-third  
13 women.

14 Q. Has that changed in recent  
15 years or has that been the way for a  
16 while?

17 A. Been about the same for a  
18 while now.

19 Q. And "for a while," I mean,  
20 the last ten years or so?

21 A. Yeah, I think that's about  
22 right.

23 Q. And your practice includes  
24 treating women for SUI; correct?

Konstantin Walmsley, M.D.

Page 41

1 A. Yes.

2 Q. And do you treat women for  
3 other urinary dysfunction?

4 A. Yes.

5 Q. Such as urge problems?

6 A. Yes.

7 Q. And you do -- does your  
8 treatment include nonsurgical treatment?

9 A. Yes.

10 Q. And it also includes  
11 surgical treatment; correct?

12 A. Yes.

13 Q. And can you tell me the  
14 types of surgery you use now to address  
15 SUI in women?

16 A. Yes. Urethral bulking  
17 procedures, autologous fascial sling  
18 treatments, and mid-urethral  
19 polypropylene mesh sling surgery.

20 Q. And the bulking, are they  
21 injections; is that how that works?

22 A. These are injections into  
23 the urethra, yes.

24 Q. Have your patients benefited

Konstantin Walmsley, M.D.

Page 42

1 from mesh mid-urethral slings?

2 A. Most of them have.

3 MS. SANTRA: Object to form.

4 This is getting into the general  
5 area that doesn't have a lot to do  
6 with Ms. Baker.

7 BY MR. PRITCHETT:

8 Q. Have you had good experience  
9 with them?

10 A. With what?

11 Q. Mesh mid-urethral slings?

12 A. Fairly good experience, yes.

13 Q. And you mentioned  
14 polypropylene. Is this the same  
15 polypropylene that you use in your  
16 practice that was used in the TVT Secur?

17 A. I'm not sure.

18 Q. Well, it's a polypropylene  
19 mesh; correct?

20 A. Yeah, but -- this is true.

21 Q. So --

22 A. In that sense, that's  
23 correct.

24 Q. Configuration may be

Konstantin Walmsley, M.D.

Page 43

1 different?

2 A. You know, the edge of the  
3 TVT Secur mesh was palpably, to my  
4 examination, having felt multiple meshes,  
5 was different. It was a sharper-edged  
6 mesh, but it was a polypropylene  
7 lightweight mesh.

8 Q. You agree that TVT Secur is  
9 a lightweight, large-pore polypropylene  
10 mesh?

11 A. Yes.

12 Q. And all of the mesh slings  
13 that you currently use are large-pore  
14 polypropylene?

15 A. Lightweight mesh, yes.

16 Q. And I know from reading  
17 about you that your practice has changed  
18 a little bit on your surgical treatment.  
19 So tell me, how many polypropylene  
20 mid-urethral slings have you implanted in  
21 your career to treat SUI in women?

22 MS. SANTRA: Object to form.

23 THE WITNESS: I would reckon

24 -- I mean, in the hundreds,

Konstantin Walmsley, M.D.

Page 44

1           probably -- somewhere between 225  
2           and 350 or in thereabouts.

3                   I was a more active  
4           implanter earlier in my career.  
5           I'm less active of an implanter  
6           now, but I still do the  
7           procedures.

8                   So I'm thinking to myself,  
9           if I've been in practice for 12  
10          years and I was as busy as 20 to  
11          30 a year, but then it tapered off  
12          to about maybe 10, it's somewhere  
13          in that 200-plus range of some  
14          kind.

15   BY MR. PRITCHETT:

16           Q.     But you still use  
17   polypropylene mesh slings for treatment  
18   of SUI in women?

19           A.     In select women, I do, yes.

20           Q.     And when's the last time you  
21   used the mesh sling?

22           A.     About three weeks ago.

23           Q.     You mentioned that you also  
24   do autologous fascial sling procedures;

Konstantin Walmsley, M.D.

Page 45

1 correct?

2 A. I do.

3 Q. How do you decide whether to  
4 use the autologous fascial sling in a  
5 patient versus the mesh mid-urethral  
6 sling?

7 A. Well, it's a joint  
8 discussion between the patient and  
9 myself. So some of the dynamic to use  
10 one or the other is patient driven and  
11 some of it is perhaps more doctor driven.

12 As far as the consideration  
13 I put in towards using autologous fascia  
14 as opposed to synthetic mesh, it depends  
15 on their degree of sexual activity and it  
16 also depends to some degree on their age  
17 and also to some degree on their  
18 understanding and willingness to accept  
19 mesh-specific risks.

20 Q. When you said it was patient  
21 driven, what did you mean by that? Are  
22 you talking about those factors?

23 A. I think, to some degree, I'd  
24 almost just as soon educate the patient

Konstantin Walmsley, M.D.

Page 46

1 towards my concerns and what I think are  
2 pros and cons of each and then deferring  
3 the judgment to the patient.

4 Q. Are there advantages of  
5 synthetic mesh mid-urethral slings over  
6 autologous fascial sling procedures?

7 MS. SANTRA: Object to form.

8 THE WITNESS: To some  
9 degree.

10 BY MR. PRITCHETT:

11 Q. What are those?

12 A. Well, there's less morbidity  
13 because they're -- in the sense of  
14 incision, because if you're using an  
15 autologous fascial sling, you have to  
16 harvest this tissue from the host site.

17 For the surgeon, it takes a  
18 bit more time and sweat equity, if you  
19 will, to execute the procedure. So it's  
20 a little more laborious for the surgeon,  
21 which for a patient may be an advantage  
22 because it's a shorter procedure; for a  
23 surgeon, might be an advantage because  
24 the sling, quite frankly, is technically

Konstantin Walmsley, M.D.

Page 47

1 an easier procedure.

2 Q. So it's, generally speaking,  
3 an easier procedure?

4 MS. SANTRA: Object to form.

5 MR. PRITCHETT: I'm talking  
6 about the mesh.

7 THE WITNESS: From a  
8 technical standpoint, the mesh is  
9 felt to be easier. I think that's  
10 a reasonable conclusion.

11 BY MR. PRITCHETT:

12 Q. And it's quicker?

13 MS. SANTRA: Object to form.

14 THE WITNESS: It's a quicker  
15 procedure.

16 BY MR. PRITCHETT:

17 Q. Is it outpatient?

18 A. Yes.

19 Q. Is autologous fascial sling  
20 procedures outpatient?

21 A. Usually that's a 23-hour  
22 admission, you know, where they'll stay  
23 overnight.

24 Q. From the extra incision, can

Konstantin Walmsley, M.D.

Page 48

1 additional complications occur in the  
2 autologous fascial sling procedure?

3 MS. SANTRA: Object to form.

4 THE WITNESS: Those are  
5 infrequent, but they can happen.

6 BY MR. PRITCHETT:

7 Q. And what are those?

8 MS. SANTRA: Object to form.

9 THE WITNESS: Wound  
10 infections, pain at the incision  
11 site. There theoretically can be  
12 risks of hernias where the mesh is  
13 excised, although typically that  
14 doesn't really occur.

15 BY MR. PRITCHETT:

16 Q. Can that pain become  
17 chronic?

18 MS. SANTRA: Object to form.

19 THE WITNESS: I've never  
20 seen that myself, but I suppose in  
21 theory it can.

22 BY MR. PRITCHETT:

23 Q. Have you ever taken part in  
24 studies regarding the treatment of SUI in

Konstantin Walmsley, M.D.

Page 49

1 women?

2 A. No.

3 Q. Have you published any  
4 peer-reviewed literature regarding mesh  
5 mid-urethral sling procedures?

6 A. I have not.

7 Q. Or the products themselves?

8 A. I have not.

9 Q. Have you taken part in  
10 studies regarding the treatment of SUI in  
11 women using autologous fascial slings?

12 MS. SANTRA: Object to form.

13 THE WITNESS: I have not.

14 BY MR. PRITCHETT:

15 Q. Have you ever used TVT  
16 products?

17 A. I have.

18 Q. And which ones did you use  
19 and approximately when?

20 A. I used the TVT Classic from  
21 2001 to 2005. I used the TVT-O in the  
22 2006 to 2007 arena. And that is it.

23 Q. Between 2001 and 2007, were  
24 you also performing autologous sling

Konstantin Walmsley, M.D.

Page 50

1 procedures to treat SUI in women?

2 MS. SANTRA: Object to form.

3 THE WITNESS: Earlier on,

4 yes.

5 BY MR. PRITCHETT:

6 Q. What do you mean, "earlier  
7 on"?

8 A. You pointed to a six-year  
9 window --

10 Q. Yes -- here's my point: At  
11 the time you were using TVT products, you  
12 were also in some cases doing autologous  
13 fascial sling procedures --

14 A. That's correct.

15 Q. And how would you -- again,  
16 would you use the same process to decide  
17 for a patient which procedure to use?

18 A. Well, it's different today  
19 than it was back then.

20 Q. How is it different?

21 A. Well, today, my concerns as  
22 it relate to the permanence of some of  
23 the complications I've seen with mesh  
24 slings, there is a higher proportion of

Konstantin Walmsley, M.D.

Page 51

1 patients who would, let's say, more  
2 strongly consider the autologous fascial  
3 sling than the mid-urethral sling  
4 procedure.

5 And for that matter, there's  
6 a growing number of patients in my  
7 practice that would just as soon defer on  
8 surgery altogether rather than getting  
9 the problem fixed.

10 Q. Just live with it.

11 A. There's more patients who  
12 have taken on that opinion.

13 Q. But when you were using the  
14 TVT products between 2001 and 2007, what  
15 would drive you to recommend to a patient  
16 using autologous fascial slings?

17 A. Well, I think to be fair,  
18 you're talking about a span of time where  
19 I was a resident, a fellow, and then in  
20 private practice.

21 So obviously, as a resident  
22 and fellow, I didn't have as much input  
23 into the choice of procedure being done.  
24 In my private practice, I really only

Konstantin Walmsley, M.D.

Page 52

1 used TVT on the order of a handful of  
2 times before I started using other  
3 products anyway, and I really wasn't  
4 doing many autologous fascial slings  
5 early in my private practice because  
6 there had been such a full swing or shift  
7 towards the use of the mid-urethral  
8 slings at that time.

9 Q. But when you did use it,  
10 what would drive that consideration,  
11 autologous fascial slings versus a TVT  
12 product?

13 A. Primarily the attending that  
14 I was working with at the time, because  
15 when I first got into private practice, I  
16 wasn't performing any autologous fascial  
17 slings. I was using exclusively  
18 mid-urethral slings.

19 Q. During 2001 to 2007, were  
20 you using mesh mid-urethral slings  
21 manufactured by others?

22 A. Yes.

23 Q. And what types did you use?

24 A. I used the AMS SPARC kit. I

Konstantin Walmsley, M.D.

Page 53

1 used the Boston Scientific kit, which I  
2 believe was called Obtryx at the time,  
3 and then I also started using a sling  
4 made by Bard called the Uretex sling.

5 Q. And what would drive you on  
6 which manufacturer's sling to use?

7 MS. SANTRA: I'm going to  
8 object to form that this is all  
9 general opinion. We've gone  
10 almost an hour now without talking  
11 about Ms. Baker.

12 THE WITNESS: Those  
13 decisions were a little bit more  
14 kind of subjective. They weren't  
15 necessarily based on my -- an  
16 objective conclusion that one mesh  
17 was different or better than the  
18 other.

19 In the instance of my early  
20 years, I probably used the Bard  
21 sling because I appreciated the  
22 elasticity to that sling and felt  
23 -- as it felt ex-vivo, without  
24 having been implanted, it felt

Konstantin Walmsley, M.D.

Page 54

1 more smooth and supple.

2 BY MR. PRITCHETT:

3 Q. I'm going to get into some  
4 of the potential risks of mesh surgery  
5 and we'll get into as it relates to Ms.  
6 Baker as well, but you agree that mesh  
7 mid-urethral surgery to treat SUI in  
8 women has -- it is a pelvic floor  
9 surgery; correct?

10 A. Yes.

11 Q. And there are certain  
12 potential risks of pelvic floor surgery  
13 whether using mesh or not using mesh;  
14 correct?

15 A. Correct.

16 Q. And dyspareunia is a risk of  
17 pelvic floor surgery; correct?

18 MS. SANTRA: Object to form.

19 THE WITNESS: Yes.

20 BY MR. PRITCHETT:

21 Q. Scarring is a risk; correct?

22 A. Correct.

23 Q. Voiding dysfunction's a  
24 risk.

Konstantin Walmsley, M.D.

Page 55

1 A. Correct.

2 Q. Potential for surgery in the  
3 future to address problems is a risk.

4 MS. SANTRA: Object to form.

5 THE WITNESS: Well, that's a  
6 little bit of apples to oranges.

7 I mean, I think generally

8 speaking, that's true; but

9 obviously, as we know, the use of  
10 mesh creates additional surgeries

11 that are more mesh specific, if

12 you will.

13 BY MR. PRITCHETT:

14 Q. But whether you're using  
15 mesh or not, there could be complications  
16 that arise that would require additional  
17 surgery; correct?

18 MS. SANTRA: Object to form.

19 THE WITNESS: In theory,  
20 true.

21 BY MR. PRITCHETT:

22 Q. Have you known of an  
23 instance where additional surgery was  
24 needed to address a problem arising from

Konstantin Walmsley, M.D.

Page 56

1 a pelvic floor surgery that did not use  
2 mesh?

3 A. Yeah. Yes.

4 Q. Has that happened to you or  
5 to someone -- one of your colleagues?

6 A. That has happened to one of  
7 my colleagues as a matter of fact.

8 Q. And just to move on, would  
9 you agree that bleeding, wound  
10 complications, adhesions, nerve damage,  
11 neuromuscular problems, and fistula  
12 formation are all potential risk of  
13 pelvic floor surgery?

14 A. Yes.

15 Q. And would you agree that  
16 those potential risks were discussed in  
17 medical literature by the time of Ms.  
18 Baker's surgery in June of 2009?

19 A. I would believe so.

20 Q. Would you agree that those  
21 are all potential risks of TVT Secur  
22 surgery as well; correct?

23 A. Yes.

24 Q. And the risks that we just

Konstantin Walmsley, M.D.

Page 57

1     went through, you yourself learned those  
2     from colleagues, studies, reading  
3     articles that we talked -- talked about  
4     before; is that correct?

5                     MS. SANTRA: Object to form.

6                     THE WITNESS: And my own  
7     personal clinical experience, yes.

8                     MR. PRITCHETT: And your own  
9     clinical experience.

10    BY MR. PRITCHETT:

11                    Q.     Is any one source of  
12    information about potential risks more  
13    important than the other?

14                    MS. SANTRA: Object to form.

15                    THE WITNESS: I mean, I  
16    guess there could be more  
17    importance as it relates to  
18    reliability or credibility of the  
19    source.

20                    You know, for example, if,  
21    you know, a colleague of mine at a  
22    community hospital said, oh, I  
23    experienced complications A, B,  
24    and C with this, but they didn't

Konstantin Walmsley, M.D.

Page 58

1           give me the severity, the true  
2           incidence, I would probably weight  
3           that less than what, for example,  
4           is put forth in an IFU or, for  
5           example, what a key opinion leader  
6           might share with me in the context  
7           of a peer-reviewed article, so...

8       BY MR. PRITCHETT:

9           Q.     All right.

10           It's fair to say, since we  
11       don't have the deposition of Dr. Hodges  
12       and you've never talked to her, we don't  
13       know what she discussed with Ms. Baker in  
14       June of 2009 preceding her TVT Secur  
15       surgery; correct?

16           A.     That's correct.

17           Q.     And you can't say what Dr.  
18       Hodges knew about the potential risks  
19       before performing the TVT Secur surgery  
20       on Ms. Baker; correct?

21                   MS. SANTRA: Object to form.

22                   THE WITNESS: Correct.

23       BY MR. PRITCHETT:

24           Q.     Is it your experience then

Konstantin Walmsley, M.D.

Page 59

1 that doctors armed with information about  
2 potential risks and complications decide  
3 what to talk to the patient about;  
4 correct?

5 A. I believe that's what  
6 happens, yeah.

7 Q. Is it your experience that  
8 some doctors are more thorough and  
9 detailed in their discussions with  
10 patients about potential risks and the  
11 informed consent process than others?

12 MS. SANTRA: Object to form.

13 THE WITNESS: I would  
14 imagine that exists.

15 BY MR. PRITCHETT:

16 Q. Are you critical in any way  
17 of Dr. Hodges' recommendation to use the  
18 TVT Secur for Ms. Baker?

19 A. I'm not.

20 Q. I take it you read the  
21 operative report?

22 A. I did.

23 Q. And all of Dr. Hodges'  
24 records preop and postop?

Konstantin Walmsley, M.D.

Page 60

1 A. Yes, I have.

2 Q. Any criticisms of her  
3 technique in the surgery?

4 A. No.

5 Q. Any criticisms of her care  
6 and treatment before or after the  
7 surgery?

8 A. No.

9 Q. Do you know -- let me back  
10 up.

11 Can the TVT Secur be  
12 implanted using a U approach or a hammock  
13 approach?

14 A. Yes.

15 Q. Do you know which approach  
16 Dr. Hodges used?

17 A. I'd have to look again at  
18 that operative note to recall.

19 Q. Is that significant to your  
20 opinions, which approach she may have  
21 used?

22 A. Yes, and I recall the  
23 approach she used, but I don't have her  
24 operative note in front of me to relate

Konstantin Walmsley, M.D.

Page 61

1 to that. I'd have to really see it to  
2 specifically recall it.

3 MR. PRITCHETT: Let me see  
4 if I can find it for you.

5 We can, if you want, make  
6 this an exhibit, but I'm just more  
7 concerned about refreshing his  
8 memory.

9 Let me hand you what is  
10 titled "Operative Report, Western  
11 Baptist Hospital, June 18, 2009"  
12 for Dawn Baker.

13 (Pause.)

14 THE WITNESS: So I suspect  
15 that it was a -- a hammock or  
16 transobturator placement.

17 BY MR. PRITCHETT:

18 Q. And why is that significant  
19 to your case-specific opinions?

20 A. Well, sometimes in the  
21 setting of pelvic pain, especially if  
22 patients have groin pain, it's more  
23 consistent with the transobturator  
24 approach as opposed to the retropubic

Konstantin Walmsley, M.D.

Page 62

1 approach.

2 Q. Thank you.

3 A. You're welcome.

4 Q. Do you know what training  
5 Dr. Hodges received for mesh mid-urethral  
6 sling procedures before Ms. Baker's  
7 surgery?

8 A. I'm not aware of that.

9 Q. Of course you don't know  
10 what medical literature she may have read  
11 before Ms. Baker's surgery in 2009?

12 A. No, sir.

13 Q. You don't know what her  
14 clinical experience was with TVT Secur  
15 with her patients?

16 A. I do not.

17 Q. Do you have any basis for  
18 thinking that the IFU for the TVT Secur  
19 was the only source of information  
20 available to Dr. Hodges to assess  
21 potential risks and complications before  
22 recommending Ms. Baker's surgery?

23 A. I do not.

24 Q. Do you know -- you don't

Konstantin Walmsley, M.D.

Page 63

1 know if she even read the IFU for the TVT  
2 Secur before Ms. Baker's surgery;  
3 correct?

4 A. I don't know the answer to  
5 that question.

6 Q. Well, you don't know if she  
7 had ever read it before Ms. Baker's  
8 surgery; correct?

9 MS. SANTRA: Object to form.

10 THE WITNESS: Yeah, I don't  
11 know if she did or did not read  
12 it, that's correct.

13 BY MR. PRITCHETT:

14 Q. Now, you've never designed a  
15 mesh product. Right?

16 A. I have not.

17 Q. Have you ever designed any  
18 kind of medical device?

19 A. No, not directly.

20 Q. What do you mean by "not  
21 directly"?

22 A. I mean, I've never gotten a  
23 patent for modifying or changing a  
24 device, but I've come up with, you know,

Konstantin Walmsley, M.D.

Page 64

1 creative ways in the operating room to  
2 make devices work more effectively for  
3 me. They're off label and not patented.

4 Q. Well, I don't want to coopt  
5 your innovations and run to the patent --

6 A. It's quite all right. I'm  
7 happy to share it with you --

8 Q. -- and run to the patent  
9 office.

10 A. Yeah. But I can give you  
11 examples of where I've jerry-rigged, you  
12 know, devices to make them work better  
13 for me, if that's -- but that doesn't  
14 answer your question.

15 Q. But never commercialized.

16 A. No, sir.

17 Q. Have you ever consulted with  
18 a manufacturer about information to be  
19 included in an IFU?

20 A. I've not.

21 Q. And you don't consider  
22 yourself to be an expert in FDA medical  
23 device labeling requirements?

24 A. No.

Konstantin Walmsley, M.D.

Page 65

1 Q. Do you consider yourself an  
2 expert in any way on the laws and  
3 regulations of the Food and Drug  
4 Administration?

5 A. I do not.

6 Q. Is it your opinion that --  
7 or do you have an opinion one way or  
8 another whether Dawn Baker had ISU in  
9 June of 2009 before her surgery?

10 A. SUI, do you mean?

11 MR. PRITCHETT: SUI. What  
12 did I say?

13 MS. SANTRA: ISU. I thought  
14 it was a term I hadn't heard  
15 before.

16 MR. PRITCHETT: Let me try  
17 that again.

18 BY MR. PRITCHETT:

19 Q. Do you have an opinion  
20 whether Ms. Baker had SIU (sic) -- I  
21 almost did it again -- in June 2009  
22 before her surgery?

23 A. Yes.

24 Q. And what is that opinion?

Konstantin Walmsley, M.D.

Page 66

1           A.     When she saw Dr. Hodges in  
2     May of 2009, she had complaints  
3     consistent with SUI.

4           Q.     You mentioned that, in your  
5     -- you had read some of the medical  
6     records pertaining to Dawn Baker prior to  
7     her treatment by Dr. Hodges; correct?

8           A.     Yes.

9           Q.     Do you agree that Ms. Baker  
10    had mixed urinary incontinence before her  
11    mesh sling surgery?

12          A.     In part, I do, yes.

13          Q.     What part do you not agree  
14    with?

15          A.     The urodynamic testing that  
16    was done on June 17th was more reflective  
17    and documented as SUI; however, she did  
18    have overactive bladder complaints and  
19    had been on overactive bladder drugs  
20    prior to that time.

21                 So I think the records  
22    support the presence of mixed urinary  
23    incontinence, although there's some  
24    mention made to stress urinary

Konstantin Walmsley, M.D.

Page 67

1 incontinence more so than mixed.

2 Q. And you're relying on the --  
3 Dr. Hodges' records to say that she had  
4 SUI predominantly over urge?

5 A. Yes. Both Dr. Hodges and  
6 her primary care doctor, too, for that  
7 matter.

8 Q. Do you know -- and we'll  
9 look at some records.

10 Do you recall how long Ms.  
11 Baker had mixed urinary incontinence  
12 before her mesh sling surgery?

13 A. Roughly three years or so.

14 MR. PRITCHETT: Let me hand  
15 you what I'm marking as Exhibit 6.

16 - - -

17 (Deposition Exhibit No.  
18 Walmsley (Baker)-6, Notes of  
19 Office Visits from Rural Health  
20 for Dawn Baker, BAKERD  
21 RURALH\_MDR00024, was marked for  
22 identification.)

23 - - -

24 BY MR. PRITCHETT:

Konstantin Walmsley, M.D.

Page 68

1           Q.     And, Doctor, I'll represent  
2     to you that these are medical records we  
3     obtained from Rural Health pertaining to  
4     the care and treatment of Dawn Baker. I  
5     want to -- at least these are notes of  
6     office visits; does that look like that's  
7     what Exhibit 6 is?

8                     Do you agree that these are  
9     office notes from a visit, it appears;  
10    correct?

11           A.     Yes.

12           Q.     The date was cut off on the  
13    top, but I'll represent to you that the  
14    date on the top office visit is August 9,  
15    2006 and you can see a transcription date  
16    on the bottom, 8/29/06.

17                     Do you see that?

18           A.     I do.

19           Q.     I just want to go over the  
20    symptoms that she was seeing someone for.  
21    It says: She is complaining of urinary  
22    stress incontinence. When she has to get  
23    to the bathroom, she has to go then or  
24    she won't make it.

Konstantin Walmsley, M.D.

Page 69

1 Did I read that correctly?

2 A. Yes.

3 Q. Does that sound like SUI or  
4 urge or something else?

5 A. It sounds more urge  
6 consistent than SUI consistent.

7 Q. And if you'll look at the  
8 next visit on the same exhibit, it  
9 appears to be an office visit July 10,  
10 2007. Do you see that?

11 A. Yes.

12 Q. And the symptoms states:  
13 Patient presents today with complaints of  
14 urinary incontinence and bladder spasms.  
15 She wants something done.

16 A. Yes.

17 Q. She has to take a change of  
18 clothes. She leaks if she laughs,  
19 coughs, or sneezes. She has difficulty  
20 if she has to urinate. If she does not  
21 get to the bathroom right away, then it  
22 is too late.

23 Did I read that part  
24 correctly?

Konstantin Walmsley, M.D.

Page 70

1 A. Yes.

2 Q. And does that sound like  
3 mixed incontinence?

4 A. It sounds more like mixed  
5 incontinence in this description, yes.

6 Q. Can you tell from that  
7 description which one is predominant over  
8 the other?

9 A. It's hard to.

10 MR. PRITCHETT: Let me hand  
11 you what I'll mark as Exhibit 7 --

12 THE WITNESS: Can we take a  
13 break?

14 MR. PRITCHETT: Sure.

15 (A recess was taken from  
16 1:12 p.m. to 1:17 p.m.)

17 BY MR. PRITCHETT:

18 Q. Are you ready to continue,  
19 Doctor?

20 A. Yes, sir.

21 - - -

22 (Deposition Exhibit No.  
23 Walmsley (Baker)-7, Notes of  
24 Office Visits from Rural Health

Konstantin Walmsley, M.D.

Page 71

1           for Dawn Baker from January and  
2           February 2009, was marked for  
3           identification.)

4                               - - -

5       BY MR. PRITCHETT:

6           Q.     I'm going to hand you what's  
7       been marked as Exhibit 7. And these are  
8       additional office visits from Rural  
9       Health in 2009, before Ms. Baker's  
10      surgery in June.

11                   I want you to look at the  
12      office visit of February 10, 2009. Do  
13      you see that?

14           A.     Yes.

15                   MS. SANTRA: Can I have a  
16      copy?

17                   MR. PRITCHETT: Oh, I'm  
18      sorry. I'm just holding it.

19                   MS. SANTRA: Thank you.

20       BY MR. PRITCHETT:

21           Q.     It states: She wants to  
22      talk to me and discuss the Depo. She is  
23      having some breast tenderness. She said  
24      she started having vaginal bleeding

Konstantin Walmsley, M.D.

Page 72

1 today. She has been having pain after  
2 intercourse that will last for 10 to 15  
3 minutes just in the last couple of weeks.

4 Did I read that correctly?

5 A. Yes, sir.

6 Q. Do you interpret the Depo to  
7 refer to Depo-Provera?

8 A. Yes.

9 Q. And that's a female hormone  
10 contraceptive; correct?

11 A. Correct.

12 Q. Are you familiar with that  
13 drug?

14 A. Somewhat, yeah.

15 Q. Is pain after intercourse a  
16 side effect of that drug?

17 A. I'm not sure.

18 Q. Does this indicate to you  
19 that she was having painful intercourse  
20 before her mesh surgery?

21 A. Not to my mind, no.

22 Q. Why is that?

23 A. Only because she's not  
24 having pain with intercourse. It's pain

Konstantin Walmsley, M.D.

Page 73

1 after intercourse. And I think, from a  
2 technical standpoint, I mean, dyspareunia  
3 is pain with intercourse.

4 Q. Okay.

5 A. Yeah.

6 MR. PRITCHETT: Let me hand  
7 you what I'm marking as Exhibit 8.

8 - - -

9 (Deposition Exhibit No.  
10 Walmsley (Baker)-8, 5/11/09 Notes  
11 of Date of Encounter with Dawn  
12 Baker by Kupper,  
13 BAKERD\_UGP\_MDR00002 through  
14 BAKERD\_UGP\_MDR00007, was marked  
15 for identification.)

16 - - -

17 BY MR. PRITCHETT:

18 Q. And this is notes from a --  
19 records from a Dr. Robert Kupper who is a  
20 urologist in Paducah. And it's dated May  
21 11, 2009.

22 Did you review this record  
23 before formulating your opinions in this  
24 case or do you know?

Konstantin Walmsley, M.D.

Page 74

1           A.     I don't specifically recall  
2     this record.

3           Q.     I want you to look at, under  
4     the history of present -- well, chief  
5     complaint is keeps wetting on self. Do  
6     you see that?

7           A.     I do.

8           Q.     And it's in quotes. And  
9     "History of Present Illness," I want to  
10    read a few sentences -- and please feel  
11    free to read the whole thing if you want,  
12    Doctor -- it says: Miss Baker is a  
13    37-year-old Caucasian female sent to me  
14    in consultation by Dr. Tom Staton because  
15    of urinary incontinence. This lady has  
16    had trouble with wetting on herself for a  
17    year and a half, maybe a little bit  
18    longer. Over the past six months,  
19    however, it has gotten worse. She leaks  
20    when she cannot get to the bathroom in  
21    time. She gives me a history of what  
22    sounds like typical overactive bladder  
23    symptoms, frequency - voiding small  
24    amounts, urgency, cannot get to the

Konstantin Walmsley, M.D.

Page 75

1 bathroom and will leak on her way to the  
2 bathroom, or urge incontinence.

3 Did I read that mostly  
4 correctly?

5 A. Yes.

6 Q. And then it goes on to say  
7 she also leaks with coughing, laughing,  
8 sneezing.

9 And then he goes on to say  
10 that he -- he says it sounds like a  
11 combination or complex urinary  
12 incontinence; is that correct?

13 A. Yes.

14 Q. Do you agree just based upon  
15 that description that Ms. Baker before  
16 her mesh surgery had complex urinary  
17 incontinence?

18 A. Yes.

19 Q. And is that another way of  
20 saying mixed incontinence?

21 A. Yes.

22 Q. And you agree she had  
23 overactive bladder symptoms?

24 A. Correct.

Konstantin Walmsley, M.D.

Page 76

1 Q. Can you tell from that  
2 record whether Ms. Baker had  
3 predominantly urge or frequency  
4 incontinence as opposed to stress at that  
5 time?

6 A. Could you repeat the  
7 question?

8 Q. I think I should.  
9 You say in your report that  
10 you think she now has -- the urge  
11 incontinence predominates over stress.

12 A. I say that today?

13 Q. I think so -- well, or do  
14 you?

15 If you look at the next to  
16 the last page of your report, just above  
17 case specific opinion number 4 and you  
18 say, "Mrs. Baker currently has this  
19 complaint having evolved from a patient  
20 with an SUI-dominant incontinence picture  
21 to a predominantly urgency urinary  
22 incontinence form of MUI."

23 A. That's correct.

24 Q. Do you think, based upon the

Konstantin Walmsley, M.D.

Page 77

1 urologist in Paducah, that Ms. Baker, a  
2 month before her mesh implant surgery,  
3 had predominantly urgency urinary  
4 incontinence?

5 MS. SANTRA: Object to form.

6 THE WITNESS: I do not think  
7 so, no.

8 BY MR. PRITCHETT:

9 Q. Why is that?

10 A. Well, I think, to his words,  
11 first off, it's complex and, second off,  
12 his history of the present illness as  
13 well as his physical examination really  
14 points towards a true mixed component.

15 She has history of stress  
16 incontinence. She also has a history of  
17 urge incontinence. She has physical exam  
18 findings of urethral hypermobility  
19 consistent with stress incontinence, but  
20 wouldn't allow one to conclude that it's  
21 entirely stress incontinence.

22 She's been given medications  
23 that would theoretically help with  
24 overactive bladder or urgency-related

Konstantin Walmsley, M.D.

Page 78

1 incontinence, but those medications have  
2 proven to be ineffective. In other  
3 words, I think it's truly mixed.

4 Q. Do those medication --  
5 you're referring to Detrol or Enablex?

6 A. Correct.

7 Q. Do they also cure urinary  
8 urge incontinence?

9 A. They occasionally can cure  
10 urge incontinence. The most typical  
11 scenario is that they have some degree of  
12 positive impact on that.

13 Q. But they don't always work.

14 A. They don't always work, but  
15 oftentimes in the setting of true urgency  
16 incontinence from overactive bladder,  
17 you'll see at least some dent or impact  
18 on the problem, not that you would always  
19 see that, but typically you do.

20 Q. I guess I don't understand  
21 -- other than the medication part,  
22 medication's not working -- why you can  
23 conclude that at this point in time that  
24 she had a -- SUI predominated over urge.

Konstantin Walmsley, M.D.

Page 79

1           A.     A lot of that comes from the  
2 urodynamics report that Dr. Hodges  
3 performed.

4           Q.     But based upon this record,  
5 putting aside -- we'll get to Dr. Hodges.

6           A.     Okay.

7                   MS. SANTRA: Object to form.

8                   THE WITNESS: Based on this  
9 record, I think it would be more  
10 challenging as a standalone record  
11 to opine that one type of  
12 incontinence predominates over the  
13 other.

14 BY MR. PRITCHETT:

15           Q.     Any significance to you that  
16 he could not elicit any stress  
17 incontinence at the examination?

18           A.     Not especially, no.

19           Q.     And then his plan on the  
20 next page talks about going slow, trying  
21 a nonoperative approach, which includes  
22 dietary changes, Kegel exercises, not --  
23 timed voiding, et cetera.

24                   Do you agree with his plan?

Konstantin Walmsley, M.D.

Page 80

1 A. I think it's reasonable.

2 Q. And how long would it take  
3 to determine whether the nonoperative  
4 approach was working?

5 A. I would imagine at least a  
6 couple of weeks.

7 MR. PRITCHETT: Let me hand  
8 you Exhibit 9, I think which will  
9 be the last new exhibit.

10

11 (Deposition Exhibit No.  
12 Walmsley (Baker)-9, 6/18/09  
13 "Appendix B - Bladder Health  
14 Questionnaire (Sample)" for Dawn  
15 Baker, BAKERD\_PSR\_00007 and  
16 BAKERD\_PSR\_00008, was marked for  
17 identification.)

18

19 BY MR. PRITCHETT:

20 Q. And this is a bladder health  
21 questionnaire dated June 18, 2009. This  
22 was out of Dr. Hodges' office.

23 Is this a record that you  
24 looked at before formulating your

Konstantin Walmsley, M.D.

Page 81

1 opinions in this case?

2 A. Yes.

3 Q. And is this, a bladder  
4 questionnaire, something you use in your  
5 practice?

6 A. Not this type of  
7 questionnaire directly, but certainly  
8 similar questions are asked.

9 Q. And this is self-reporting  
10 by the patient, you think?

11 A. Yes.

12 Q. Do you -- in looking at  
13 this, particularly where it says -- the  
14 question's about, "Do you lose urine  
15 when," can you tell from this whether Ms.  
16 Baker had urge predominating over stress  
17 or vice versa?

18 A. No.

19 Q. And look at the third  
20 question from the bottom. It says, "Have  
21 you ever had urethra (bladder tube)  
22 stretched?" And she marked "yes."

23 A. Yes.

24 Q. Do you know what that's

Konstantin Walmsley, M.D.

Page 82

1 referring to?

2 A. As a child, she had a  
3 urethral dilation procedure performed.

4 Q. And what is that?

5 A. A urethral dilation  
6 procedure is a procedure where the  
7 urethral tube is serially stretched open  
8 or dilated, usually with the use of metal  
9 rods that are called sounds.

10 Q. Sounds terrible.

11 A. Probably better to do under  
12 sedation, yes.

13 Q. Can that cause any lasting  
14 problems with urinary dysfunction?

15 A. Well, it depends on if the  
16 problem re-presents itself, in other  
17 words, urethral stenosis or urethral  
18 stricture.

19 I get the sense that with  
20 her, the problem didn't return because  
21 she's never been treated for that  
22 condition since that time.

23 Q. You can put that aside.

24 I want to talk to you about

Konstantin Walmsley, M.D.

Page 83

1 your IME, and you examined her in your  
2 New Jersey office; is that correct?

3 A. Yes.

4 Q. And you've performed exams  
5 for litigation before?

6 A. I have.

7 Q. And when you're retained as  
8 an expert for litigation, do you always  
9 do an exam before giving your opinions?

10 A. Not always.

11 Q. So you've given opinions in  
12 litigation without an examination.

13 A. I have.

14 Q. And what determines whether  
15 you do an examination of a litigant or  
16 not?

17 A. I don't know if I can  
18 completely answer that question because  
19 sometimes I'm not even asked to.

20 Q. Okay. Well, that may be the  
21 answer. Sometimes you're asked to,  
22 sometimes you're not; correct?

23 A. I think that might be one of  
24 the answers, yeah.

Konstantin Walmsley, M.D.

Page 84

1 Q. Did she have any -- did she  
2 report any difficulties traveling to New  
3 Jersey?

4 MS. SANTRA: Object to form.

5 THE WITNESS: I don't quite  
6 recall.

7 BY MR. PRITCHETT:

8 Q. Sitting here, if she walked  
9 in the door, would you recognize her?

10 A. I would.

11 Q. Because that was just a few  
12 months ago?

13 A. Yeah, it was June 20th  
14 specifically.

15 Q. Did anyone accompany her to  
16 your office?

17 A. I don't specifically recall  
18 that.

19 Q. Was anyone present in the  
20 room for the exam?

21 A. Yes.

22 Q. Who?

23 A. One of my medical  
24 assistants.

Konstantin Walmsley, M.D.

Page 85

1 Q. Did she bring any documents  
2 with her, like medical records or  
3 anything else?

4 A. No.

5 Q. What did you know about Ms.  
6 Baker before you did your examination in  
7 June?

8 A. Not very much. I typically  
9 try to review medical records after the  
10 IME, only because I find that I can see  
11 and meet the patient and have a clearer,  
12 kind of unfettered conscience, if you  
13 will, about the patient.

14 Q. Had you reviewed any medical  
15 records at all?

16 A. I may have, but more often  
17 than not, I typically review the medical  
18 records after the IME.

19 Q. Had you read her plaintiff  
20 fact sheet or any of the other materials  
21 that had been sent to you?

22 A. That, I did not look at  
23 beforehand.

24 Q. Did counsel request any

Konstantin Walmsley, M.D.

Page 86

1 facts or data that they wanted you to  
2 consider in your exam?

3 A. No.

4 Q. And was that the only  
5 meeting you had with her, Ms. Baker?

6 A. Yes, that was the only  
7 meeting.

8 Q. You've had no communications  
9 with her since.

10 A. I have not.

11 Q. And this was for purposes of  
12 an independent examination, but not for  
13 care and treatment; correct?

14 A. Yes.

15 Q. Any differences in how you  
16 would conduct an exam in your -- from  
17 your clinical practice?

18 A. No.

19 Q. What were the components of  
20 the exam?

21 A. History taking, followed by  
22 a physical examination, followed by a  
23 review of all the data and the  
24 designation of diagnoses or assessments.

Konstantin Walmsley, M.D.

Page 87

1 Q. And how long did the actual  
2 examination last?

3 A. Probably about 45 minutes.

4 Q. And the rest was how long?  
5 How long was she with you total?

6 A. She was in the office  
7 probably for a good hour. I guess in  
8 terms of the physical exam portion of the  
9 evaluation, that was probably on the  
10 order of five to ten minutes.

11 Q. So you did a pelvic exam.  
12 Right?

13 A. Yes.

14 Q. Did you do testing of any  
15 kind?

16 A. Other than her urine  
17 analysis, no.

18 Q. So you didn't do a Q-Tip  
19 test or -- that's considered -- I  
20 consider that a test. Okay? So let's  
21 just make sure we got our terminology  
22 right.

23 Other than a pelvic  
24 examination, urinalysis, you didn't do

Konstantin Walmsley, M.D.

Page 88

1 anything else.

2 A. Well, I did an examination  
3 outside of the pelvis as well.

4 Q. Sure.

5 A. But as it relates to the  
6 pelvis exam, I did not do a Q-Tip test.  
7 I did not perform a cystoscopy or a  
8 urodynamics test.

9 Q. Are the entire details of  
10 your exam described in your -- either  
11 your report, Exhibit 2, or your encounter  
12 summary, which is Exhibit 5?

13 A. Yes.

14 Q. Was she on any medications  
15 at the time? I think you indicate no  
16 medications reported, looking at Exhibit  
17 5, first page in the middle?

18 A. Yeah. For whatever reason,  
19 there are no medications listed that she  
20 was taking.

21 Q. Was she wearing any pads or  
22 liners?

23 A. I did not see them on her  
24 when I examined her.

Konstantin Walmsley, M.D.

Page 89

1 Q. Did you ask whether she was  
2 using pads or liners?

3 A. I did.

4 Q. What did she say?

5 A. She stated to me that she  
6 used pads for social reasons.

7 Q. Did she say when she -- I  
8 understand why she may wear them, but how  
9 often or --

10 A. She wasn't using them all  
11 the time or on a daily basis. The extent  
12 of my questioning was when she used them,  
13 and the answer that she gave me was, she  
14 used them for social reasons, but I  
15 didn't delve into the nature of her  
16 social reasons.

17 I concluded that it was  
18 probably if she was out for long periods  
19 of time or going to a party or going to  
20 the mall for a few hours, those types of  
21 instances. That was like my conclusion  
22 based on her answer.

23 Q. Did she tell you anything  
24 about her urethral stretching?

Konstantin Walmsley, M.D.

Page 90

1 A. Not specifically.

2 Q. Can you tell me your  
3 objective findings of the presence of SUI  
4 during that visit?

5 A. Well, I didn't specifically  
6 tailor my exam to generate objective  
7 findings of SUI, because if I were to  
8 have done that, I would have, for  
9 example, had her do some provocative  
10 maneuvers with her bladder full.

11 By the time she had seen me,  
12 she had submitted a urine analysis and  
13 for the most part had emptied her  
14 bladder. So examining patients in that  
15 fashion, you're not going to elicit  
16 objectively stress incontinence because  
17 their bladder has no fluid in it.

18 Q. I understand.

19 If her bladder had been  
20 full, would you expect her to leak if she  
21 stood and coughed?

22 A. I would expect her to be at  
23 risk for that, yes.

24 Q. Okay.

Konstantin Walmsley, M.D.

Page 91

1 A. Yeah.

2 Q. What do you mean by "at  
3 risk"? She may or may not?

4 A. Well, I mean, I think,  
5 strictly speaking, different patients  
6 have different leak point pressures. If  
7 she was someone who had mild stress  
8 incontinence, she might not necessarily  
9 leak reproducibly with a provocative  
10 maneuver as if she had severe stress  
11 incontinence, let's say.

12 Q. Could you determine whether  
13 she has mild or severe SUI?

14 A. I would probably term it in  
15 the mild to moderate category based upon  
16 her history, based upon what she was  
17 relating to me as the type and nature of  
18 her incontinence.

19 Q. Do you have an opinion  
20 whether her SUI is worse, the same, or  
21 not as severe as she had before her  
22 surgery?

23 A. I think it's hard to draw  
24 that conclusion. I wasn't able to glean

Konstantin Walmsley, M.D.

Page 92

1 from her if it was worse and, if so, how.  
2 I mean, to some degree, one tries to do  
3 that on the basis of pad use or even pad  
4 weight. I'm not privy to that  
5 information, so it's hard to,  
6 quantitatively at least, point to  
7 severity before and after.

8 Q. Recurrence of SUI, though,  
9 was a known risk of mesh surgery at the  
10 time she had hers; correct?

11 A. Yes.

12 Q. Because not all the  
13 surgeries are a hundred percent  
14 successful; correct?

15 A. Right.

16 Q. You mentioned she also had  
17 urge incontinence?

18 A. Yes.

19 Q. How did you determine  
20 objectively whether she had urge  
21 incontinence?

22 A. Once again, you know, I  
23 think objective is a challenge. Because  
24 when I'm thinking objective findings, I'm

Konstantin Walmsley, M.D.

Page 93

1     thinking, you know, active leaking onto a  
2     pad, having a feeling of urgency. So  
3     this was a largely clinical diagnosis  
4     made as much on history taking as it was  
5     on a physical exam.

6             Q.     And she had urge  
7     incontinence before her mesh surgery,  
8     too. Remember us talking about that?

9             A.     We did.

10            Q.     Could you tell or can you  
11     tell me whether her urge incontinence is  
12     worse today, the same, or not as severe  
13     as -- than it was before the surgery?

14            MS. SANTRA: Object to form.

15            THE WITNESS: In terms of my  
16     interviewing of the patient, what  
17     I would conclude is that her mixed  
18     urinary incontinence today is now  
19     more urge today than it was  
20     stress.

21            So the question of, is her  
22     urgency urinary incontinence worse  
23     today than the urgency urinary  
24     incontinence she had before her

Konstantin Walmsley, M.D.

Page 94

1 surgery is difficult for me to  
2 answer, because once again, we're  
3 talking quantitatively about the  
4 severity of her incontinence and I  
5 can't sit here and say she's using  
6 more pads today than she was, for  
7 example, before her surgery.

8 BY MR. PRITCHETT:

9 Q. And maybe this is asking the  
10 same question, just a little bit  
11 differently, but she had mixed urinary  
12 incontinence before her mesh surgery;  
13 correct?

14 A. Yes.

15 Q. And she has it now in your  
16 opinion; correct?

17 A. Yes.

18 Q. And would you give the same  
19 answer if I asked you whether her mixed  
20 incontinence is worse than it was before  
21 the surgery?

22 A. I think you have to just  
23 restate it again if you don't mind. I'm  
24 sorry.

Konstantin Walmsley, M.D.

Page 95

1           Q.     I asked you whether her SUI  
2     was different now than before her  
3     surgery.

4           A.     Right.

5           Q.     And I asked you about her  
6     urge, whether that was different now than  
7     it was before her surgery.

8                     What about the overall  
9     package, the mixed incontinence; can you  
10    tell me whether in your opinion it's  
11    worse, the same, or not as severe as it  
12    was before her mesh surgery?

13                    MS. SANTRA: Object to form.

14                    THE WITNESS: I would  
15                    probably only like to use the word  
16                    different.

17    BY MR. PRITCHETT:

18           Q.     How so?

19           A.     Because I think, now, it's  
20    more urgency related than stress related,  
21    to her accounts at least.

22                    MR. PRITCHETT: Can we take  
23                    a short break?

24                    (A recess was taken from

Konstantin Walmsley, M.D.

Page 96

1 1:43 p.m. to 1:47 p.m.)

2 BY MR. PRITCHETT:

3 Q. Doctor, during your  
4 examination of Ms. Baker, did you see any  
5 evidence of exposure, erosion, or  
6 extrusion?

7 A. No, sir.

8 Q. Did you see any evidence of  
9 roping, banding, or curling?

10 A. No, I did not.

11 Q. Did you see any evidence of  
12 degradation?

13 A. No.

14 Q. What about contraction or  
15 shrinkage?

16 A. Yes.

17 Q. And what evidence did you  
18 observe?

19 A. Well, during my IME, there  
20 was some scar tissue noted underneath the  
21 sling.

22 Q. So you're looking at page 2  
23 of Exhibit 5 under "Female Genitalia"?

24 A. That's correct.

Konstantin Walmsley, M.D.

Page 97

1 Q. And is it the bold part,  
2 "Sling is palpable in the mid-urethra"?

3 A. Yes.

4 Q. "Mild induration noted  
5 laterally at the sulci"?

6 A. That's correct.

7 Q. More right than left?

8 A. Yes.

9 Q. And so is that the scar  
10 plate that you referred to in your  
11 report?

12 A. That's correct.

13 Q. You're inferring there's  
14 contraction or shrinkage because of the  
15 scarring that you felt; is that what  
16 you're saying?

17 MS. SANTRA: Object to form.

18 THE WITNESS: That's  
19 correct.

20 BY MR. PRITCHETT:

21 Q. And what causes the  
22 scarring?

23 A. Typically what happens when  
24 mesh is implanted is, there is a chronic

Konstantin Walmsley, M.D.

Page 98

1 inflammatory response that generates  
2 fibrosis and scarring.

3 Q. Would you agree that the  
4 only way to know for sure if there was  
5 chronic inflammation is to do a biopsy?

6 A. I think that would be very  
7 helpful.

8 Q. Did you see any inflammation  
9 or redness in and around the urethra  
10 area?

11 A. I did not.

12 Q. Did you see redness or  
13 inflammation anywhere else?

14 A. I did not.

15 Q. I want to make sure I have  
16 all of Ms. Baker's symptomatic conditions  
17 which you are attributing to the mesh.  
18 You have pelvic pain. Right?

19 A. Yes.

20 Q. Vaginal pain. Right?

21 A. Yes.

22 Q. Now, is that only with  
23 intercourse where she has the vaginal  
24 pain?

Konstantin Walmsley, M.D.

Page 99

1 A. Yes.

2 Q. So if she's not having  
3 intercourse, she's not having vaginal  
4 pain; is that correct?

5 A. Correct.

6 Q. And then you report mixed  
7 urinary incontinence, which we've talked  
8 about; correct?

9 A. Yes.

10 Q. Are there any other  
11 symptomatic conditions which you  
12 attribute to the mesh other than what we  
13 just discussed or just listed?

14 A. Just those three.

15 Q. You have no opinions about  
16 difficulties with bowel movements?

17 A. I do not.

18 Q. You have no opinions about  
19 numbness in her right leg?

20 A. I do not.

21 Q. You have no opinions about  
22 bleeding?

23 A. I do not.

24 Q. You have no opinions about

Konstantin Walmsley, M.D.

Page 100

1 urinary tract infections?

2 A. Not directly, no.

3 Q. Well, what do you mean  
4 "directly"?

5 A. Well, sometimes one can see  
6 a higher risk of infections in patients  
7 who have voiding dysfunction and, as an  
8 example, patients with more severe  
9 incontinence can be at risk for urinary  
10 tract infections, patients who don't  
11 empty their bladders completely might be  
12 at more risk for urinary tract  
13 infections.

14 We've discussed that,  
15 quantitatively, it's hard for me to  
16 objectify if her incontinence is worse  
17 today than before her sling, so I can't  
18 directly correlate her urinary tract  
19 infection risk directly at least with the  
20 sling.

21 But if, in fact, her  
22 incontinence is an issue and her  
23 incontinence were to be worse, it would  
24 be something to consider.

Konstantin Walmsley, M.D.

Page 101

1 Q. Do you agree that she had a  
2 history of urinary tract infections  
3 before the mesh sling surgery?

4 A. I do agree with that, yeah.

5 Q. And her uranalysis was  
6 normal?

7 A. That's correct.

8 Q. And you did not do a urine  
9 culture; correct?

10 A. I did not.

11 Q. And I didn't see urinary  
12 tract infection mentioned anywhere in  
13 your encounter summary, Exhibit 5, or  
14 Exhibit 2. Is it mentioned anywhere?

15 A. This is true.

16 Q. And you have no opinions  
17 about her claim to emotional injuries;  
18 correct?

19 A. No.

20 Q. I want to talk about the  
21 scar plate formation opinion a little  
22 bit. You agree that some scarring is  
23 expected in a mesh sling surgery;  
24 correct?

Konstantin Walmsley, M.D.

Page 102

1 A. Correct.

2 Q. You mentioned the sling is  
3 palpable and I think you clarified it for  
4 me already. That was the -- you weren't  
5 palpating the actual sling. You were  
6 palpating what you thought was scar  
7 tissue; correct?

8 A. A little bit of both. I  
9 mean, I was palpating the scar tissue,  
10 but knowing that there was mesh material  
11 in and around it.

12 Q. But you couldn't feel the  
13 mesh.

14 A. I couldn't literally feel  
15 the actual mesh itself, no.

16 Q. Was the sling where you  
17 would expect it to be?

18 A. Yes.

19 Q. It didn't appear to have  
20 migrated or anything?

21 A. No.

22 Q. Did you detect and record  
23 any evidence of tenderness under the  
24 sling at the level of the mid-urethra

Konstantin Walmsley, M.D.

Page 103

1 going to the periurethral space?

2 A. Periurethrally, yes.

3 Generally speaking, when I'm  
4 mentioning induration and pain  
5 reproducible on palpation, it's  
6 correlating with the induration that's  
7 noted. In her case, it was more so on  
8 the right side than the left side.

9 Q. And can you quantify, length  
10 or whatever, how much scar plate tissue  
11 you felt?

12 A. Well, I think to be fair,  
13 there was scar throughout the entire  
14 sling, but there was more thickness  
15 towards the edges.

16 So as you're extending out  
17 from the mid-urethra towards the  
18 periurethral tissues in the upper corners  
19 of the vagina, there was more scar tissue  
20 in those areas.

21 Q. Did she mention anything to  
22 you about feeling a tugging on her left  
23 side?

24 A. She developed feeling a

Konstantin Walmsley, M.D.

Page 104

1 pulling pain on the groin on the right  
2 side.

3 Q. What about the left side?

4 I didn't see it either.

5 A. She did not mention that to  
6 me.

7 Q. And let's go on to the --  
8 because I have limited time. Let's go on  
9 to the -- your second opinion about the  
10 pelvic pain and dyspareunia.

11 Let me ask you first, where  
12 did you detect the pelvic pain?

13 A. So on physical exam, her  
14 pain was in the vaginal space, in the  
15 area of the sling, more so on the right  
16 lateral side of the sling than the left.

17 Q. And pelvic pain, again, was  
18 a known potential risk of any pelvic  
19 floor surgery; correct?

20 A. Yes.

21 Q. Can painful bladder syndrome  
22 cause pelvic pain?

23 A. Yes, it can.

24 Q. Do you think she has painful

Konstantin Walmsley, M.D.

Page 105

1 bladder syndrome?

2 A. No, I don't.

3 Q. Why?

4 A. Well, she doesn't meet the  
5 criteria to have that syndrome.

6 Q. Okay. What is the criteria?

7 A. So interstitial cystitis or  
8 painful bladder syndrome is a disease  
9 state characterized by pelvic pain,  
10 accompanied by irritative voiding  
11 symptoms that typically has been going on  
12 for a period of time greater than six  
13 months.

14 The other diagnostic  
15 criteria include cystoscopy with findings  
16 that would otherwise be reflective of  
17 interstitial cystitis, usually findings  
18 whereby one sees changes within the  
19 bladder lining during the cystoscopy that  
20 would otherwise be reflective of  
21 interstitial cystitis.

22 In most instances, we're not  
23 encountering patients with interstitial  
24 cystitis. They're having frequency on

Konstantin Walmsley, M.D.

Page 106

1 the order of 15, 20, 30 times, so they  
2 have fairly severe frequency.

3 Q. But the -- the severity of  
4 it can vary from 15 to 30. Right?

5 A. True.

6 Q. Can painful bladder syndrome  
7 cause dyspareunia?

8 MS. SANTRA: Object to form.

9 THE WITNESS: Possibly, yes.

10 BY MR. PRITCHETT:

11 Q. Was interstitial cystitis  
12 something that you considered in your  
13 differential diagnosis? Because I don't  
14 see it mentioned.

15 A. Yes.

16 Q. Where was it mentioned?

17 A. Well, recognized causes of  
18 dyspareunia following synthetic mesh  
19 sling surgery include a variety of  
20 different causations; and in my report, I  
21 list infection and inflammation,  
22 including, but not limited to,  
23 vestibulitis.

24 I rule that out on the basis

Konstantin Walmsley, M.D.

Page 107

1 of the fact that not only did my exam not  
2 reflect that, but she had no at least  
3 recent history of interstitial cystitis  
4 in her medical records.

5 So based on my IME and the  
6 medical records that I reviewed in this  
7 particular setting, interstitial cystitis  
8 was not a factor I took into -- I mean, I  
9 -- I excluded it, shall we say.

10 Q. Did you recall seeing a  
11 medical record from her treating doctor,  
12 Dr. Cardenas, where he was considering  
13 the possibility of IC?

14 A. I do, yeah. Yes. Although,  
15 I think, to be fair, I thought Dr.  
16 Cardenas may have called to question  
17 possibly it being a bowel-related issue.

18 Q. And you don't think she has  
19 any bowel-related issues?

20 A. I don't recall any strong or  
21 compelling history of IBS or bowel issues  
22 in this patient.

23 Q. Did you -- I'm going to talk  
24 about the vaginal pain/dyspareunia. Did

Konstantin Walmsley, M.D.

Page 108

1 you detect or note in your report or your  
2 encounter summary any tenderness in the  
3 vaginal opening?

4 A. Well, the tenderness was  
5 fairly close to the vaginal opening that  
6 I elicited, but it wasn't -- it didn't --  
7 to your question, I didn't elicit  
8 tenderness immediately upon introducing  
9 my fingertips into Ms. Baker's vagina  
10 during the exam.

11 Q. It was with further  
12 penetration that you elicited --

13 A. Some.

14 Q. -- some tenderness?

15 A. Some -- some further  
16 penetration. I mean, perhaps between 1  
17 and 3 inches upon entry.

18 Q. If there was -- she had  
19 tenderness in the vaginal opening, not 1  
20 to more inches, but at the vaginal  
21 opening, would you agree that that could  
22 not be caused by the mesh?

23 MS. SANTRA: Object to form.

24 THE WITNESS: If it was

Konstantin Walmsley, M.D.

Page 109

1 exclusively right at the  
2 introitus, it would be very hard  
3 to attribute that to pelvic mesh.

4 BY MR. PRITCHETT:

5 Q. You read Dr. Khandwala's  
6 report; correct?

7 A. I did.

8 Q. And he mentioned vulvodynia;  
9 correct?

10 A. There is mention made of  
11 that.

12 Q. Do you agree with his  
13 statements about vulvodynia?

14 A. When you say do I agree with  
15 it, I mean, it's memorialized as such.

16 Q. I don't understand.

17 A. I -- you know, I examined  
18 her vulva as well and I did not use a  
19 Q-Tip. I used my own gloved fingers and  
20 didn't get a similar response vis-a-vis  
21 pain.

22 But obviously he  
23 memorialized and documented not only did  
24 she have vulvodynia, but significant

Konstantin Walmsley, M.D.

Page 110

1     vulvodynia.

2             Q.     I'm going to jump down to --  
3     because I'm running out of time -- to  
4     prognosis. And I just have a question.  
5     You say -- and this is opinion number 4,  
6     Exhibit 2 -- you say, in part, "Moreover,  
7     she has pelvic tenderness and residual  
8     scar tissue in the area where her mesh  
9     erosion was treated."

10                   Is that a mistake?

11             A.     That should not say that.

12             Q.     It's the third sentence on  
13     your case specific opinion number 4.

14             A.     No, that's incorrect.

15             Q.     Is that left over from  
16     another report or --

17             A.     That must have been some  
18     sort of a residual or not cutting a  
19     sentence out or something of that degree.  
20     That can be entirely omitted.

21             Q.     You mention that future  
22     surgery could help address Ms. Baker's  
23     dyspareunia; correct?

24             A.     Correct.

Konstantin Walmsley, M.D.

Page 111

1 Q. Have any of her treating  
2 doctors ever recommended removal of the  
3 mesh sling?

4 A. Well, there's only one  
5 doctor in particular and Dr. Cardenas did  
6 not.

7 Q. Are you aware of any of her  
8 treating doctors who agree with you and  
9 say that the mesh is causing her  
10 symptoms?

11 MS. SANTRA: Object to form.

12 THE WITNESS: No.

13 BY MR. PRITCHETT:

14 Q. If she had not had surgery  
15 to treat her SUI in 2009, would she still  
16 likely have complex urinary incontinence  
17 that Dr. Kupper described?

18 A. I mean, assuming she had no  
19 other type of antiincontinence surgery  
20 whatsoever?

21 Q. Yes, sir.

22 A. I would imagine she would or  
23 she may.

24 Q. So she'd still have problems

Konstantin Walmsley, M.D.

Page 112

1 wetting herself. Right?

2 MS. SANTRA: Object to form.

3 THE WITNESS: Likely.

4 BY MR. PRITCHETT:

5 Q. Is there any significance to  
6 you that Ms. Baker did not report to any  
7 healthcare provider any leaking until  
8 August of 2013, other than her postop  
9 follow-up visit with Dr. Hodges?

10 A. To one extent, based on her  
11 specifically, the significance to me  
12 falls into the fact that she wasn't one  
13 to necessarily see doctors. She was  
14 somewhat of a stoic patient who really  
15 oftentimes didn't seek out medical care.

16 And I do recall with her in  
17 particular a bit of a disconcerting  
18 comment that she didn't see Dr. Hodges --  
19 or she had trouble seeing doctors in the  
20 area because they weren't comfortable  
21 addressing what she perceived as a  
22 mesh-specific problem.

23 Q. Is that something she told  
24 you?

Konstantin Walmsley, M.D.

Page 113

1           A.     I recall her saying  
2     something to that extent to me and I  
3     found it a little disconcerting.

4           Q.     Was that something she told  
5     you or something she said in her  
6     deposition?

7           A.     Both.

8           Q.     But she did see treaters  
9     between June of 2009 and August of 2013;  
10    correct?

11          A.     She did.

12          Q.     Any significance to you that  
13    she did not report painful intercourse to  
14    any treater following her 2009 surgery?

15                MS. SANTRA: Object to form.

16                THE WITNESS: What was the  
17    latter point? Was that 2013 that  
18    you said that, from 2009 to 2013?

19                MR. PRITCHETT: Well, on  
20    dyspareunia. Let me just ask it  
21    again.

22    BY MR. PRITCHETT:

23          Q.     Any significance to you that  
24    Ms. Baker did not report painful

Konstantin Walmsley, M.D.

Page 114

1 intercourse to any treater after her 2009  
2 surgery?

3 MS. SANTRA: Object to the  
4 form.

5 THE WITNESS: I mean, the  
6 only significance I guess to that  
7 is, I guess, number 1, it depends  
8 on the context, if it's actually,  
9 number one, asked; and number two,  
10 to what extent she would be  
11 comfortable discussing that topic  
12 with a provider.

13 Obviously, the flip-side of  
14 that significance is that, well,  
15 maybe it wasn't as significant for  
16 her to bring it up, but I think  
17 there are obviously two sides of  
18 an analysis there.

19 BY MR. PRITCHETT:

20 Q. Any significance to you that  
21 Dr. Cardenas noted that Ms. Baker was  
22 menopausal in 2015?

23 A. Yes.

24 Q. What's the significance of

Konstantin Walmsley, M.D.

Page 115

1 that?

2 A. Well, I think the  
3 significance of that is that when one  
4 enters their menopause, they do run the  
5 risk of things such as vulvovaginal  
6 atrophy, which could present problems  
7 with pelvic pain and/or dyspareunia.

8 Q. Is she to your knowledge  
9 under any hormone replacement treatment?

10 A. No, not to my knowledge.

11 Q. But you still rule out  
12 vaginal atrophy as a potential cause of  
13 her dyspareunia even though she is  
14 experiencing menopause?

15 A. Well, both during my IME and  
16 Dr. Khandwala's IME and even Dr.  
17 Cardenas' evaluation, there's no  
18 documentation of vulvovaginal atrophy.

19 Q. Tell me about any comments  
20 or criticisms you have of Dr. Cardenas'  
21 report that you said you reviewed.

22 A. You know, the only comments  
23 I would have are that he and I did our  
24 exams somewhat differently and probably

Konstantin Walmsley, M.D.

Page 116

1 memorialized different findings. He also  
2 arrived at a conclusion that I wouldn't  
3 necessarily have arrived at, that being  
4 the diagnosis of interstitial cystitis.

5 Q. He also doesn't think she  
6 has recurrent SUI; is that correct?

7 A. He did put forth that  
8 opinion.

9 Q. Well, specifically, any  
10 criticism of how he conducted the  
11 examination? You said he did it  
12 differently.

13 A. Not per se. I mean, the  
14 only area of interest that I have just  
15 difficulty understanding is how the  
16 anterior fornix exam was described.

17 Q. And what's your difficulty  
18 in understanding that?

19 A. Well, he documents  
20 tenderness at the level of the bladder on  
21 bimanual exam. He and I have somewhat of  
22 a similar finding there as it relates to  
23 I find tenderness palpating the mesh at  
24 the vaginal sulci, which are quite near

Konstantin Walmsley, M.D.

Page 117

1 the bladder.

2 And then there's another  
3 mention of tenderness at the level of the  
4 bladder just with a speculum exam,  
5 opening the anterior blade of the  
6 speculum, and I guess I don't understand  
7 where that tenderness is occurring.

8 In other words, is it  
9 occurring where the speculum is in  
10 contact with the vaginal tissues? Is it  
11 occurring where there's some pulling of  
12 scar tissue that's not near the speculum?

13 So just from a semantics  
14 standpoint, I'm not sure if the  
15 tenderness that Dr. Khandwala is  
16 describing in his physical exam is the  
17 same as mine.

18 Q. Okay.

19 A. The other critique obviously  
20 is, the idea of doing a cystoscopy is not  
21 an appropriate one. The patient did have  
22 on dipstick trace blood, which raises the  
23 possibility of microhematuria, and she  
24 did have irritative voiding symptoms.

Konstantin Walmsley, M.D.

Page 118

1                   That being said, the fact  
2   that once he got to 300 cc's, she had  
3   extreme discomfort, the fact that the  
4   bladder still looked completely normal at  
5   that time, in other words, had no  
6   inflammatory changes, leads me to have a  
7   hard time concluding that she must have  
8   had interstitial cystitis simply because  
9   there was discomfort with the cystoscope  
10  in her bladder at 300 cc's.

11               Q.    Is it your opinion there's  
12  just no way that Ms. Baker has IC?

13               A.    I would probably discount it  
14  on the basis of my own findings, but I  
15  think it's important to understand that  
16  interstitial cystitis, for lack of a  
17  better term, is a bit of a wastebasket  
18  diagnosis. It's not necessarily a  
19  diagnostic criterion where there are  
20  objective measures that need to be hit or  
21  obtained to make the diagnosis.

22                   So it's a diagnosis that's  
23  certainly put forth on plenty of  
24  occasions, but a lot of times, the

Konstantin Walmsley, M.D.

Page 119

1     footing or the objective criteria to  
2     support that diagnosis are challenging to  
3     put forth.

4                     And I disagree with the  
5     diagnosis of interstitial cystitis, not  
6     only on the basis of my interview with  
7     the patient and my experience in treating  
8     the disease state, but also on the means  
9     by which the diagnosis was reached, on  
10    the basis of a cystoscopy where at 300  
11    cc's, there was pain, but no changes in  
12    the bladder that would otherwise suggest  
13    inflammation, glomerulations, ulcers, or  
14    other findings that we see in patients  
15    with interstitial cystitis.

16                    Q.     Any other criticisms or  
17     areas of disagreement?

18                    MS. SANTRA:   Can we check on  
19     the time?

20                             -   -   -

21                             (A discussion off the record  
22     occurred.)

23                             -   -   -

24                    MR. PRITCHETT:   Can I get

Konstantin Walmsley, M.D.

Page 120

1           that one --

2                   MS. SANTRA: Yeah, you can  
3           -- that's fine, actually.

4                   THE WITNESS: The only other  
5           critique I would make is that Dr.  
6           Khandwala concluded that she had  
7           deep dyspareunia on the basis of  
8           his exam when, in fact, the pain  
9           that she had, which was at the  
10          level of the bladder, really is  
11          not necessarily one of deep  
12          dyspareunia.

13                   It's actually dyspareunia  
14          that, location-wise, is more in  
15          the midportion or the distal  
16          portion of the vagina.

17                   MR. PRITCHETT: Dr.  
18          Walmsley, thank you very much. I  
19          am out of time.

20                   THE WITNESS: Thank you.

21                           - - -

22                           EXAMINATION

23                           - - -

24          BY MS. SANTRA:

Konstantin Walmsley, M.D.

Page 121

1 Q. I'm going to try to get  
2 right into it, because I know you need to  
3 go, but I may skip around a little bit.

4 I'm going to talk for a  
5 little bit about your reliance list. And  
6 when you wrote your report for Ms. Baker,  
7 you had reviewed Dr. Blaivas' general  
8 report on the TVT Secur; is that right?

9 A. I did.

10 Q. And you actually -- through  
11 your materials reviewed list, you  
12 incorporated Dr. Blaivas' general  
13 opinions on the TVT-S into your report;  
14 correct?

15 A. Yes.

16 Q. And in addition to Dr.  
17 Blaivas' general report on the TVT-S, you  
18 also note in general that the TVT-S can  
19 cause the types of symptoms that Ms.  
20 Baker has experienced; is that correct?

21 A. Yes.

22 Q. And you know that not only  
23 from Dr. Blaivas' report, but also from  
24 your clinical experience, your education

Konstantin Walmsley, M.D.

Page 122

1 and training, and your review of the  
2 medical literature; correct?

3 A. Yes.

4 Q. And the medical literature  
5 that you listed in your reliance list,  
6 that's not an exhaustive list of every  
7 article you've ever read relating to  
8 polypropylene mesh; is that correct?

9 A. That's correct.

10 Q. And so, you know, these  
11 articles that you've listed, while they  
12 may be very relevant to Ms. -- your  
13 report for Ms. Baker, that's by no means  
14 an exclusive list of everything you've  
15 ever read; correct?

16 MR. PRITCHETT: Objection;  
17 form.

18 THE WITNESS: Correct.

19 BY MS. SANTRA:

20 Q. And so when you're rendering  
21 your opinions for Ms. Baker, you're  
22 relying on your knowledge from the time  
23 you were in medical school and all of  
24 those classes that you took and articles

Konstantin Walmsley, M.D.

Page 123

1 that you've reviewed over the past, let's  
2 say, 15, 20 years; is that right?

3 A. Correct.

4 Q. And so that knowledge is  
5 somewhat cumulative; is that correct?

6 A. Yes.

7 Q. And so I think you stated  
8 earlier, it's kind of hard to point to  
9 one article versus another article. And  
10 is that because you're relying kind of on  
11 your general knowledge based on your  
12 experience and training just as a  
13 urologist for the past 15, 20 years?

14 A. That's in part true, yes.

15 Q. And I want to go to your  
16 opinion -- your first opinion in your  
17 report, your general opinion on the IFU  
18 for the TVT Secur in 2009. And what is  
19 your experience with IFUs?

20 A. I use IFUs in my practice to  
21 understand surgical technique and also  
22 understand potential precautions, adverse  
23 events, contraindications to the use of a  
24 device.

Konstantin Walmsley, M.D.

Page 124

1                   MR. PRITCHETT: Let me just  
2                   object to questions about his two  
3                   general opinions as opposed to his  
4                   case-specific opinions. I was not  
5                   permitted to ask about the general  
6                   opinions and you should not be  
7                   either.

8                   MS. SANTRA: I've let you go  
9                   on for probably over an hour about  
10                  his general opinions. I simply  
11                  objected. So I'm going to keep  
12                  asking my questions.

13                  MR. PRITCHETT: It was  
14                  background, nothing about his  
15                  general opinions.

16                  MS. SANTRA: Okay. Well,  
17                  I'm going to ask these background  
18                  -- actually, I'm going to ask  
19                  these questions about his opinion  
20                  which is in his case-specific  
21                  report for Ms. Baker, which you  
22                  were allowed to go into in depth.

23       BY MS. SANTRA:

24                  Q.       And so in making your

Konstantin Walmsley, M.D.

Page 125

1 opinion about the IFU for the TVT Secur  
2 in 2009, were you relying on your  
3 experience as a practicing urologist who  
4 reads IFUs regularly as part of your  
5 practice?

6 MR. PRITCHETT: Objection;  
7 form.

8 THE WITNESS: Yes.

9 BY MS. SANTRA:

10 Q. And who relies on those IFUs  
11 regularly when using medical devices?

12 MR. PRITCHETT: Objection;  
13 form.

14 THE WITNESS: Yes.

15 BY MS. SANTRA:

16 Q. And counsel asked you some  
17 questions about whether you can know what  
18 Dr. Hodges knew. Do you remember those  
19 questions?

20 A. Yes.

21 Q. And first off, you  
22 understand that Dr. Hodges has not been  
23 deposed yet in this case; is that  
24 correct?

Konstantin Walmsley, M.D.

Page 126

1 A. Correct.

2 Q. And so to the extent you  
3 can't answer anything about -- any  
4 questions about Dr. Hodges' testimony,  
5 that's because -- that's not because you  
6 didn't read the deposition. That's  
7 simply because she hasn't been deposed  
8 yet; correct?

9 A. That's right.

10 Q. And does it matter to your  
11 general opinion number 1 -- would that  
12 change your opinion at all if Dr. Hodges  
13 never read the IFU?

14 MR. PRITCHETT: Objection to  
15 the form.

16 THE WITNESS: No.

17 BY MS. SANTRA:

18 Q. And why is that?

19 A. I think we talked about  
20 informed consent not relying solely upon  
21 the IFU. There are some clinicians that  
22 I think use the IFU more than others.

23 To my mind, I think when a  
24 clinician's not reading the IFU, he or

Konstantin Walmsley, M.D.

Page 127

1 she to some opinion is still making an  
2 informed consent on the basis of the IFU,  
3 because the key opinion leaders that are  
4 writing the manuscripts, the other  
5 material that a clinician uses to gain  
6 informed consent probably as a touchstone  
7 is affected by the IFU to some degree.

8 Q. And you were asked some  
9 questions about whether all pelvic  
10 surgeries have risks. Do you remember  
11 those questions?

12 A. I do.

13 Q. Do the nature and  
14 characteristics of the complications for  
15 mesh versus nonmesh surgery, are those  
16 different?

17 A. Yes.

18 Q. And how are those different?

19 A. Well, insofar as mesh is a  
20 foreign body, it induces a different type  
21 of reactional response in host tissues;  
22 and as a result of the means by which the  
23 body reacts to mesh, typically, the  
24 inflammation, the healing process is

Konstantin Walmsley, M.D.

Page 128

1 different. The inflammation is of a more  
2 chronic nature. The scarring is  
3 different when one uses mesh as opposed  
4 to biologic graft materials or even host  
5 materials.

6 As a result, you know, the  
7 qualitative nature of potential risks is  
8 greater and different.

9 Q. And so would listing the  
10 risks that go along with any surgery or  
11 any nonmesh pelvic surgery, would that be  
12 enough to warn about the nature and  
13 characteristics of the risks for a  
14 product like the TVT Secur?

15 MR. PRITCHETT: Objection;  
16 form.

17 THE WITNESS: No.

18 BY MS. SANTRA:

19 Q. And that's just because the,  
20 you know, listing vaginal pain doesn't  
21 really describe the differences that  
22 you've just talked about, for example?

23 A. That's correct.

24 Q. On your examination of Ms.

Konstantin Walmsley, M.D.

Page 129

1 Baker -- strike that.

2                   You talked earlier about  
3 your -- your opinion that there is  
4 evidence in Ms. Baker's case that she has  
5 had chronic inflammation with her TVT  
6 Secur; is that correct?

7           A.     Yes.

8           Q.     And how do you know that?

9           A.     That's in large part based  
10 on my physical examination of Mrs. Baker  
11 that identified indurated tissue and even  
12 some tenderness in the area of her sling.

13                   Typically, inflammation,  
14 that process generates scar tissue and  
15 can generate tenderness if it's still in  
16 play; in other words, if it's latent but  
17 active, the inflammation can generate  
18 tenderness.

19                   So based on her exam, which  
20 not only demonstrates the scar plate, but  
21 the tenderness, I arrived at that  
22 conclusion.

23           Q.     And does the absence of  
24 redness that you could see on an exam,

Konstantin Walmsley, M.D.

Page 130

1 does that change your opinion at all  
2 about chronic inflammation?

3 A. No.

4 Q. And why not?

5 A. Because one doesn't need to  
6 necessarily appreciate a change in color  
7 to render that diagnosis. It can be made  
8 on different bases.

9 Q. And then with the scar plate  
10 that you felt upon examining Mrs. Baker,  
11 I think you said you couldn't feel the  
12 TVT Secur mesh itself; is that right?

13 A. I could not directly feel  
14 it. I mean, in large part, if it's not  
15 eroding or extruding, it's hard to really  
16 feel it, unless it's very, very thin with  
17 regards to the vaginal epithelium or  
18 lining that you're feeling it under.

19 Q. Even though you didn't feel  
20 the -- directly the TVT Secur mesh  
21 itself, you know that the TVT Secur is  
22 what caused that scar plate; is that  
23 right?

24 A. It's part of the scar plate,

Konstantin Walmsley, M.D.

Page 131

1     yeah. It's really incorporated into that  
2     plate.

3             Q.     Okay.

4             A.     Yeah.

5             Q.     And you know that based on  
6     its location or how do you know that?

7             A.     Based on the description of  
8     Dr. Hodges on doing the surgery, based on  
9     my understanding of the surgery and the  
10    anatomy, it was very clear that where  
11    that scar plate was palpated was where  
12    the TVT Secur was placed.

13            The other thing also, just  
14    to make mention, that the TVT Secur has  
15    some wings at the end of the actual  
16    device, so it also serves as a means, if  
17    there's thicker scar tissue, generally  
18    where those wings are located can  
19    correlate with that.

20            Q.     And did that -- was that the  
21    case with Ms. Baker?

22            A.     To some degree, yes. She  
23    had somewhat more induration noted  
24    laterally where those wings would have

Konstantin Walmsley, M.D.

Page 132

1     been.

2             Q.     And how do you know that  
3     there was shrinkage or contracture in Ms.  
4     Baker's case?

5             A.     So in Ms. Baker's case, I  
6     did not put forth the opinion that the  
7     mesh sling contracted. I mean, it might  
8     have contracted.

9                     With single-incision  
10    systems, it's a little more difficult to  
11    make that conclusion in the absence of  
12    histology, because, in a lot of  
13    instances, if there is true mesh  
14    contraction, you'll actually feel the  
15    sling and feel some tautness or tightness  
16    to the sling.

17                    In this instance, the  
18    contraction to my conclusion was more on  
19    the basis of wound contraction.

20            Q.     Okay. So that was the  
21    scarring in the scar plate that you felt?

22            A.     Correct, yeah.

23            Q.     And on exam, you were able  
24    to reproduce her pain and specifically

Konstantin Walmsley, M.D.

Page 133

1 Ms. Baker was tender at the vaginal  
2 sulci; is that correct?

3 A. Yes.

4 MR. PRITCHETT: Object to  
5 the form.

6 BY MS. SANTRA:

7 Q. And could painful bladder  
8 syndrome or interstitial -- or strike  
9 that.

10 Did painful bladder system  
11 or interstitial cystitis cause that  
12 tenderness that you felt at the vaginal  
13 sulci for Ms. Baker?

14 MR. PRITCHETT: Objection to  
15 form.

16 THE WITNESS: No.

17 BY MS. SANTRA:

18 Q. And did vulvodynia cause  
19 that tenderness that you felt at the  
20 vaginal sulci for Ms. Baker?

21 A. No.

22 Q. And the cause -- a cause for  
23 that would have been the TVT Secur  
24 device; correct?

Konstantin Walmsley, M.D.

Page 134

1 A. Yes.

2 Q. And did you perform a  
3 differential diagnosis when coming to  
4 your opinions about Ms. Baker?

5 A. I did.

6 Q. And have you based your  
7 opinions concerning Ms. Baker on your  
8 clinical experience, your review of her  
9 records, your independent medical  
10 examination of Ms. Baker, and your  
11 knowledge of the medical literature?

12 A. Yes.

13 Q. When you performed your  
14 differential diagnosis for Ms. Baker, did  
15 you take into account her past surgical  
16 history, including a tubal ligation,  
17 cervical cancer with hysterectomy, and a  
18 urethra, I guess, stretching as a child?

19 A. Yes.

20 Q. And taking into  
21 consideration all of those past  
22 procedures, you found that the TVT Secur  
23 was a cause for her pelvic pain and  
24 dyspareunia; correct?

Konstantin Walmsley, M.D.

Page 135

1 A. Yes.

2 Q. And you interviewed Ms.  
3 Baker; correct?

4 A. I did.

5 Q. Did she tell you about the  
6 nature of the pain that she feels when  
7 she attempts sexual intercourse -- when  
8 she has attempted sexual intercourse?

9 A. Yes.

10 Q. And do you generally believe  
11 her about that pain that she says she  
12 experiences?

13 MR. PRITCHETT: Objection to  
14 form.

15 THE WITNESS: Yes.

16 BY MS. SANTRA:

17 Q. And would your findings upon  
18 exam comport with her symptoms of that  
19 pain?

20 A. Yes.

21 Q. And Ms. Baker reported  
22 having some stress urinary leakage today;  
23 is that right?

24 A. Yes.

Konstantin Walmsley, M.D.

Page 136

1 MR. PRITCHETT: Objection to  
2 the form.

3 THE WITNESS: Yes.

4 BY MS. SANTRA:

5 Q. And so -- and is the TVT  
6 Secur or was the TVT Secur sold by  
7 Ethicon as a permanent solution to stress  
8 urinary incontinence?

9 MR. PRITCHETT: Objection to  
10 the form.

11 THE WITNESS: I don't recall  
12 specifically permanent.

13 BY MS. SANTRA:

14 Q. Was the TVT Secur supposed  
15 -- intended to be a permanent device?

16 A. That's true, yes.

17 Q. And despite the TVT Secur  
18 being implanted, Ms. Baker continues to  
19 have stress urinary incontinence;  
20 correct?

21 MR. PRITCHETT: Objection to  
22 form.

23 THE WITNESS: Yes.

24 BY MS. SANTRA:

Konstantin Walmsley, M.D.

Page 137

1 Q. Have you rendered all your  
2 opinions today to a reasonable degree of  
3 medical certainty?

4 A. I have.

5 MS. SANTRA: I think that's  
6 all I have for you. Thank you,  
7 Doctor.

8 THE WITNESS: You're  
9 welcome.

10 (Witness excused.)

CERTIFICATE

I HEREBY CERTIFY that the witness was duly sworn by me and that the deposition is a true record of the testimony given by the witness.

It was requested before completion of the deposition that the witness, KONSTANTIN WALMSLEY, M.D., have the opportunity to read and sign the deposition transcript.

KIMBERLY A. CAHILL, a  
Federally Approved Registered  
Merit Reporter and Notary Public  
Dated: August 16, 2016

(The foregoing certification of this transcript does not apply to any reproduction of the same by any means, unless under the direct control and/or supervision of the certifying reporter.)

Konstantin Walmsley, M.D.

Page 139

1 INSTRUCTIONS TO WITNESS

2

3 Please read your deposition  
4 over carefully and make any necessary  
5 corrections. You should state the reason  
6 in the appropriate space on the errata  
7 sheet for any corrections that are made.

8 After doing so, please sign  
9 the errata sheet and date it.

10 You are signing same subject  
11 to the changes you have noted on the  
12 errata sheet, which will be attached to  
13 your deposition.

14 It is imperative that you  
15 return the original errata sheet to the  
16 deposing attorney within thirty (30) days  
17 of receipt of the deposition transcript  
18 by you. If you fail to do so, the  
19 deposition transcript may be deemed to be  
20 accurate and may be used in court.
